ANS: B

Surgical amputation of an extremity with osteosarcoma (bone cancer) is an example in which when a disease is present the treatment (amputation) is done to reduce the impact of disease by preventing the tumor from dissemination. Vaccination for rotavirus for children younger than the age of 1 year, sexual education program in elementary schools, and increasing taxes for buying cigarettes represent examples of primary prevention. Screening for gestational diabetes after 24 weeks of pregnancy is an example of secondary prevention.

2. This historic character observed was more common among women treated by physicians ~~and medical students compared with women treated by midwives. Based on his~~ observations, he implemented a hand wash policy that resulted in a decrease in mortality.

Public and Community Health Nursing Practice Demetrius James Porche,2004 Click Additional Materials for downloadable sample chapterThis text is needed very badly especially with advanced practice Most graduate nursing programs focus on primary care and an important component of primary care is community health and public health issues This book contains much needed information required for advanced nursing practice in primary care I know of no other text so complete Jacqueline Rhoads Louisiana State University Health Sciences Center A very comprehensive approach to public health community health I feel that the content and direction are very much needed Clair P Millet APRN MN CNS Louisiana Office of Public Health Public

health practice focuses on the prevention of disease and disability as a means of promoting the health of individuals and their communities. Achieving this is dependent on nurses and public health practitioners implementing the core functions of practice, assessment, assurance, and policy development. Because the public health workforce is composed of individuals from a number of disciplines with varying areas of expertise, there is a clear need for a thorough examination of the core competencies necessary for successful public health based on community needs. Developed as an advanced text for students in public and community health nursing, *Public and Community Health Nursing Practice* presents a comprehensive summary of the core functions of population based practice. This practice is the cornerstone of the Healthy People 2010 national objectives and the foundation upon which the health of a given community may be ensured. The book's population based approach, theoretical content, and emphasis on evidence based research are perfectly suited for faculty and students in nursing, public health, and behavioral medicine. Author Demetrius James Porche also includes current public health and nursing practice, making this a unique and indispensable reference for public and community health nurses and nursing administrators as well as practitioners in other specialties such as family or primary care nursing. The book also includes appendices, illustrations, tables, and chapter summaries that reiterate important public and community population based health nursing content.

Topics Covered: Behavioral health and public health organizations, Community health nursing leadership, Community level interventions and development, Cultural competence, Environmental and community assessments, Epidemiology, Population based public health, Program monitoring, evaluation and improvement, Program planning, Public health policy, law and ethics, Public health research, Public health systems and infrastructure.

Key Features: Demonstrates and emphasizes the population and evidence based approach. Includes Healthy People 2010 objectives with an emphasis on primary prevention and health promotion. Contains abundant pedagogical features including brief chapter overviews and introductions, key terms highlighted and defined in text, and chapter summaries highlighting key points. Provides eight appendices that include a number of important resources such as Core Competencies for Public Health Professionals, Healthy People 2010 Goals, Objectives, and an epidemiological glossary.
