Smart Decisions Thomas N. Martin, 2016-04-29 Today's world is complex and getting more so each day. Huge multinational corporations, international crisis and fast-breaking events require most people to make decisions on a daily basis without the tools to understand the long-term impact that today's decision might create. Because most people have never really been trained in how to make important complex decisions, most people rely on experience and gut reaction, which is okay for many decisions but not okay for a decision that will have a meaningful impact on organizations and individuals. Decision makers need to develop the art and science of strategic decision making. Here Professor Thomas Martin explains the need for decision makers to modify their thinking about how they deal with acquiring and analyzing information in each of the decision-making process steps. This approach, requiring thinking modification, will lengthen the process, make it more complex and to some more arduous, but the comprehensiveness of the new thinking approach should lead to improved and more effective decision making. In this book, Dr. Martin presents a thinking modification framework that asserts that in the decision-making process, there are three situational states: a current state, a future state, and a transitional state that one must deliberate in finding a solution. For each of these situational states, Martin develops an identical five-step process to determine the best decision to make. The steps of this process include: Change, Needing, Situational Analysis, Challenge, Framing, Causal Analysis, Generating Solution Ideas, Choosing a Solution Set, Implementation, and Aftermath Planning. This book will appeal to decision makers, leaders, and students of management who want a specific framework that details the process behind making strategic, well-informed decisions. *Demystifying Strategic Thinking* Tony Grundy, 2014-04-03 Creating a successful strategy and the process of strategic thinking is key to the growth plans of all businesses. But how do business leaders engage with, define, and manage this process? And what do today's most successful CEOs consider to be the key components of creating a successful strategy? Using unique and original interviews with 6 top business leaders, Tony Grundy examines the key components of successful strategizing: from analysis versus synthesis, competitive strategy, economic values, and overcoming strategic constraints. Using examples from the manufacturing, retailing, services, and trading industries, the book provides a strategy system for every business leader and helps managers to develop and implement a winning strategy for their organization. *Move First, Align Fast* Deepika Chopra, 2025-11-05 A start-to-finish manual for aligning your organization's teams with the latest AI technologies.
