Project 2013 in easy steps John Carroll, 2013-08-30 Microsoft Project has always been an excellent project planning, scheduling and control tool. Project 2013 continues the evolution of this product with the introduction of a simplified interface compatible with all other Office 2013 programs and a number of other enhancements. Burndown charts, a key requirement for agile project management, together with a number of new data fields to support them. New reporting features that let you create powerful, colourful, dynamic reports without exporting data to another program. Improved out of box reports and better visuals. Task paths to provide more options than the basic critical path. Extended date support up to 2149, now that would be a very long project. Backstage overhaul of the File functions makes it easier to find what you are looking for and provides a
