Do We Still Need Peer Review An Argument For Change:

Do We Still Need Peer Review? Thomas H. P. Gould, 2013 Peer review has evolved from the earliest attempts by the church to evaluate scholarly works the creation of academic peer review and finally to the current state of the process As new technology provides authors with a direct unsupervised route to publication the peer review situation is nearing a tipping point beyond which the nature of academic research will be profoundly altered In *Do We Still Need Peer Review An Argument for Change* Thomas H P Gould describe the rise of technology and the empowerment of the individual which have combined to create changes in the world of scholarly publishing Gould contends that without a lucid thought out new approach the current system of peer review is in jeopardy and an immediate effort is required by scholars to institute reform otherwise peer review might cease to exist After a thorough discussion of the foundations of peer review Gould traces its evolution from an effort to control thought by secular and ecclesiastical rulers to use in universities where peer review became detached from dogma and dictatorship Gould then considers three alternatives to peer review individuals freely publishing their work perhaps through a site hosted by an academic institution corporate sponsorship or publication through an academic commons overseen by established committees Weighing the pros and cons of each of these options *Do We Still Need Peer Review* offers an intriguing evaluation of the process and brings into focus a dilemma that needs to be addressed by the academic community Book jacket

Global Advertising in a Global Culture Thomas H. P. Gould, 2015-12-16 Globalization stems from many sources but as Thomas Gould makes clear advertising is a primary driver of trans global cultural change Gould argues that advertising often carries unfiltered and unblocked cultural messages in addition to commercial speech as such it not only builds consumer demand to open new markets but also changes consumer expectations and values At the same time the evolution of increasingly targeted mobile and social marketing is transforming local and regional cultures into a new mix of global branding and individualized micro space Gould examines how advertising professionals negotiate these rocky and quickly changing cultural terrains He also explores how advertising an increasingly global form of communication is becoming a platform for change at the individual level and as a direct consequence at the social and political levels

Climate Change A Barrie Pittock, 2009-03-31 It is widely accepted in the scientific community that climate change is a reality and that changes are happening with increasing rapidity In this second edition leading climate researcher Barrie Pittock revisits the effects that global warming is having on our planet in light of ever evolving scientific research Presenting all sides of the arguments about the science and possible remedies Pittock examines the latest analyses of climate change such as new and alarming observations regarding Arctic sea ice the recently published IPCC Fourth Assessment Report and

the policies of the new Australian Government and how they affect the implementation of climate change initiatives New material focuses on massive investments in large scale renewables such as the kind being taken up in California as well as many smaller scale activities in individual homes and businesses which are being driven by both regulatory and market mechanisms The book includes extensive endnotes with links to ongoing and updated information as well as some new illustrations While the message is clear that climate change is here and in some areas might already be having disastrous effects there is still hope for the future and the ideas presented here will inspire people to take action Climate Change The Science Impacts and Solutions is an important reference for students in environmental or social sciences policy makers and people who are genuinely concerned about the future of our environment
