Brumlik, Brumlik, 1995 For courses in Chemistry In 1965 George Brumlik developed the first molecular model set Framework Molecular Models for the sophomore student of Organic Chemistry It proved to be the model set of choice for thousands of professors over a span of twenty five years and still remains popular Now with the introduction of the Universal Molecular Models Dr Brumlik has developed a sophomore level set that once again is a first No other model on the market today demonstrates the framework of a molecule the space filling capacity of a molecule and molecular orbitals In addition the set is more scientifically accurate than anything currently available in a student price range This scientifically accurate molecular model set demonstrates the framework of a molecule the space filling capacity of a molecule and molecular orbitals Efficiently designed and constructed the UMM set is fully interchangeable with the FMM set and features color coded atomic valence spheres and connectors allowing students to represent all molecules having up to 12 atoms in their valence shells Molecular Visions (Organic, Inorganic, Organometallic) Molecular Model Kit #1 by Darling Models to accompany Organic Chemistry Darling Models, 2000-04-07 Molecular models are as vital a tool for the study of chemistry as calculators are for the study of mathematics Molecular Visions models may be assembled in infinite combinations enabling the user to construct not only familiar configurations but also undiscovered possibilities Models are intended to inspire the imagination stimulate thought and assist the visualization process They present the user with a solid form of an abstract object that can otherwise only be visualized by the chemist While chemistry textbooks use letters and graphics to describe molecules molecular models make them real MOLECULAR
