Evidence-based Practice in Education Richard Pring, Gary Thomas, 2004-03-16

Where does hunch end and evidence begin Too much is written and said about school improvement about improvements in teaching and learning with far too little attention to this question This book provides vivid discussion from distinguished protagonists and antagonists about what gets called evidence based practice Reading it all involved in education policymakers and practitioners alike can proceed more confidently Professor Tim Brighouse London Schools Commissioner

The movement to evidence based practice in education is as important as it is controversial and this book explores the arguments of leading advocates and critics The book begins with an explication of evidence based practice Some of the ideas of its proponents are discussed including the Campbell Collaboration and the application to education of Cochrane style reviews and meta analyses The thinking behind evidence based practice has been the subject of much criticism particularly in education and this criticism is aired in the second part of the book Questions have been raised about what we mean by evidence about how particular kinds of evidence may be privileged over other kinds of evidence about the transferability of research findings to practice and about the consequences of a move to evidence based practice for governance in education Given that the origins of the interest in evidence based practice come largely from its use in medicine questions arise about the validity of the transposition and contributors to the third part of the book address this transposition The issues raised in the book while primarily those raised by educators are of relevance also to professionals in medicine social work and psychology

Case Study Research in Practice Helen Simons, 2009-03-18

Case Study Research in Practice explores the theory and practice of case study research Helen Simons draws on her extensive experience of teaching and conducting case study to provide a comprehensive and practical account of how to design conduct and communicate case study research It addresses questions often raised by students and common misconceptions about case research In four sections the book covers Rationale concept and design of case study research Methods ethics and reflexivity in case study Interpreting

analyzing and reporting the case Generalizing and theorizing in case study research Rich with tales from the field and summary memos as an aide memoire to future action the book provides fresh insights and challenges for researchers to guide their practice of case study research This is an ideal text for those studying and conducting case study research in education health and social care and related social science disciplines Helen Simons is Professor Emeritus of Education University of Southampton Methods in Educational Research Lodico, Marguerite G. Lodico, Dean T. Spaulding, Katherine H. Voegtler, 2009-03-26 Science Education Research and Practice in Europe Doris Jorde, Justin Dillon, 2012-12-17 Each volume in the 7 volume series The World of Science Education reviews research in a key region of the world These regions include North America South and Latin America Asia Australia and New Zealand Europe Arab States and Sub Saharan Africa The focus of this Handbook is on science education in Europe In producing this volume the editors have invited a range of authors to describe their research in the context of developments in the continent and further afield In reading this book you are invited to consider the historical social and political contexts that have driven developments in science education research over the years A unique feature of science education in Europe is the impact of the European Union on research and development over many years A growing number of multi national projects have contributed to the establishment of a community of researchers increasingly accepting of methodological diversity That is not to say that Europe is moving towards homogeneity as this volume clearly shows Bridging the Chasm Between Research and Practice Royal W. Van Horn, 2008 Bridging the Chasm Between Research and Practice A Guide to Major Educational Research is written for anyone concerned about the education of the 48 million children in elementary and secondary schools in the United States Obviously a large number of parents teachers legislators school board members and taxpayers have a keen interest in these children s education since it costs 8 000 per year to educate a single child in the U S Unfortunately there is a chasm between the educational researchers who do the science and the general public The chasm exists because educational researchers publish their findings in low circulation stuffy academic journals that are rarely read by anyone outside the research community Bridging the Chasm Between Research and Practice is a bridge across the research practice chasm It is the first serious effort to thoroughly explain education science to the layperson in an understandable and conversational manner The accumulated body of knowledge on the following critical topics is simply and thoughtfully explained grade retention dropouts radical differences in children rearing practices remedial programs that work class size school size high stakes testing and graduation tests The vast implications of this research are also discussed *Narrative Research in Practice* Rachael Dwyer, Ian Davis, Elke Emerald, 2016-09-07 This book directly addresses the multiplicity and complexity of narrative research by illustrating a variety of avenues to pursuing and publishing research that falls under the umbrella of narrative work The chapters are drawn from a wide range of disciplines including education literary studies cultural studies music and clinical studies Each chapter considers a particular methodological issue or approach illustrating how it was addressed in the course

of the research Each of the chapters concludes with a set of discussion exercises and a further reading list The book offers a valuable resource for established researchers seeking to expand their methodological and theoretical repertoire and for graduate students and researchers new to narrative methods

Putting Research into Practice in Primary Teaching and Learning Suzi Clipson-Boyles, Graham Upton, 2013-12-19 This text explores the practical implications of a research focus for each area of the primary curriculum including RE drama and ICT along with the special needs and promoting positive behaviour Photocopiable resources provide examples of research based activity for use in the classroom
