## **Edumatics Solar System Note Taking Guide:**

*Our Solar System Teacher's Guide*, 2007-11-01 The *Our Solar System Teacher's Guide* offers detailed step by step instructional guidance and practical tips to help you get the most out of every lesson Pacing plans and placement guides help you get started with minimal preparation required and teaching notes include differentiated activities and reproducible Learning Masters at point of use Multiple assessment opportunities help you monitor student growth

**Messages from Space** Kevin Beals, John Erickson, Cary Sneider, 2000-03 Building on collaborative work between the SETI Search for Extraterrestrial Intelligence Institute and the Lawrence Hall of Science *Messages from Space* takes advantage of our fascination with extraterrestrials to catalyze study of the solar system and beyond The activities create an exciting context for students to engage in creative learning gaining a great deal of astronomical knowledge The unit begins when students attempt to decode a fictitious message from outer space Imagining that they are SETI scientists students begin to analyze where in the solar system and beyond there may be conditions favorable for life They investigate how our solar system and other planetary systems may have formed and consider how what we know about the solar system fits into a bigger picture of the universe Throughout students consider whether life could exist out there and if so how we might communicate with those lifeforms In doing so students also gain valuable experience distinguishing science fact from sensationalized fiction *Messages from Space* includes background information and diverse resources Teachers do not need to have special knowledge of astronomy to present this unit successfully All GEMS guides are thoroughly tested in classrooms nationwide and come complete with clear step by step instructions assessment suggestions literature connections and ideas for further investigation I must say that I enjoyed this unit more than any other GEMS unit I've used and so did my students The underlying theme of the message held everyone's attention and was a useful hook to grasp onto throughout the unit And the travel brochure and science fiction stories provided excellent opportunities for assessment Teacher Alexandria Virginia I would strongly recommend these creative interesting and attention grabbing activities The book would also make a great organizer for a summer or after school enrichment program at the elementary level NSTA Recommends
