Eero Saarinen 1910 1961 A Structural Expressionist:

Saarinen Pierluigi Serraino, Peter Gössel, 2009 Eero Saarinen was one of the 20th century's great visionaries both in the fields of furniture design and in architecture. Marrying curves and dynamic forms with a Modernist aesthetic, he brought a whole new dimension to architecture. *Shell Structures for Architecture* Sigrid Adriaenssens, Philippe Block, Diederik Veenendaal, Chris Williams, 2014-03-21 Featuring a foreword by Pritzker Prize Winner Shigeru Ban. Bringing together experts from research and practice, *Shell Structures for Architecture: Form Finding and Optimization* presents contemporary design methods for shell and gridshell structures, covering form finding and structural optimization techniques. It introduces architecture and engineering practitioners and students to structural shells and provides computational techniques to develop complex curved structural surfaces in the form of mathematics, computer algorithms, and design case studies. Part I introduces the topic of shells, tracing the ancient relationship between structural form and forces, the basics of shell behaviour, and the evolution of form finding and structural optimization techniques. Part II familiarizes the reader with form finding techniques to explore expressive structural geometries, covering the force density method, thrust network analysis, dynamic relaxation, and particle spring systems. Part III focuses on shell shape and topology optimization and provides a deeper understanding of gradient-based methods and meta-heuristic techniques. Part IV contains precedent studies of realised shells and gridshells, describing their innovative design and construction methods. **The Gateway Arch** Tracy Campbell, 2019-06-18 This fascinating, engaging history of St. Louis's monument to American expansion reveals a story of greed, discrimination, and community displacement. NextSTL.com Rising to a triumphant height of 630 feet, the Gateway Arch is one of the world's most widely recognized structures and attracts millions of tourists to St. Louis every year. Envisioned in 1947 but not completed until the mid-1960s, its story is one of innovation and greed, civic pride and backroom deals. Weaving together social, political, and cultural perspectives, historian Tracy Campbell uncovers the complicated and troubling history of this iconic symbol. In this revealing account, Campbell shows that the so-called Gateway to the West was the scheme of shrewd city leaders who were willing to steal an election, destroy historic buildings, and drive out communities in order to make downtown St. Louis more profitable. Campbell also tells the human story of the architect Eero Saarinen, whose prize-winning design brought him acclaim but also charges of plagiarism, and who didn't live to see the completion of his vision.

American Examples Michael J. Altman, 2021-11-16 *American Examples: New Conversations about Religion* Volume One is the first in a series of annual anthologies published in partnership with the Department of Religious Studies at The University of Alabama. The American Examples initiative gathers scholars from around the world for a series of workshops designed to generate big questions about the study of religion in America. Bypassing traditional white Protestant narratives in favor of new perspectives on belief, social formation, and identity, *American Examples* fellows offer dynamic perspectives on American faith that challenge our understandings of both America and religion as categories. In the first volume of this

exciting academic project five topically and methodologically diverse scholars vividly reimagine the potential applications of religious history The five chapters of this inaugural volume use case studies from America broadly conceived to ask larger theoretical questions that are of interest to scholars beyond the subfield of American religious history Prea Persaud's chapter explores the place of Hinduism among the creole religions of the Caribbean while Hannah Scheidt captures what atheist parents say to each other about value systems Travis Warren Cooper explains how the modernist church architecture of Columbus Indiana became central to that city's identity Samah Choudhury dissects how Muslim American comedians navigate Western ideas of knowledge and self to make their jokes and their own selves legible and Emily D Crews uses ethnographic fieldwork to read the female reproductive body among Nigerian Pentecostal congregations Editor Michael J Altman also provides a brief rich introduction assessing the state of the discipline of religious history and how the American Examples project can lead the field forward

Temples for a Modern God Jay M. Price, 2013-01-10 After World War II Americans constructed an unprecedented number of synagogues churches cathedrals chapels and other structures The book is one of the first major studies of American religious architecture in the postwar period and it reveals the diverse and complicated set of issues that emerged just as one of the nation's biggest building booms unfolded Price argues that the resulting structures as often mocked as loved were physical embodiments of an important time in American religious history
