Kuo, 2007-02-26 This is a real time digital signal processing textbook using the latest embedded Blackfin processor Analog Devices Inc ADI 20% of the text is dedicated to general real time signal processing principles The remaining text provides an overview of the Blackfin processor its programming applications and hands on exercises for users With all the practical examples given to expedite the learning development of Blackfin processors the textbook doubles as a ready to use user s guide The book is based on a step by step approach in which readers are first introduced to the DSP systems and concepts Although basic DSP concepts are introduced to allow easy referencing readers are recommended to complete a basic course on Signals and Systems before attempting to use this book This is also the first textbook that illustrates graphical programming for embedded processor using the latest LabVIEW Embedded Module for the ADI Blackfin Processors A solutions manual is available for adopters of the book from the Wiley editorial department *Embedded Signal Processing with the Micro Signal*

Architecture Woon-Seng Gan, Sen M. Kuo, 2014 , **Subband Adaptive Filtering** Kong-Aik Lee, Woon-Seng Gan, Sen M. Kuo, 2009-07-06 Subband adaptive filtering is rapidly becoming one of the most effective techniques for reducing computational complexity and improving the convergence rate of algorithms in adaptive signal processing applications This book provides an introductory yet extensive guide on the theory of various subband adaptive filtering techniques For beginners the authors discuss the basic principles that underlie the design and implementation of subband adaptive filters For advanced readers a comprehensive coverage of recent developments such as multiband tap weight adaptation delayless architectures and filter bank design methods for reducing band edge effects are included Several analysis techniques and complexity evaluation are also introduced in this book to provide better understanding of subband adaptive filtering This book bridges the gaps between the mixed domain natures of subband adaptive filtering techniques and provides enough depth to the material augmented by many MATLAB functions and examples Key Features Acts as a timely introduction for researchers graduate students and engineers who want to design and deploy subband adaptive filters in their research and applications Bridges the gaps between two distinct domains adaptive filter theory and multirate signal processing Uses a practical approach through MATLAB based source programs on the accompanying CD Includes more than 100 M files allowing readers to modify the code for different algorithms and applications and to gain more insight into the theory and concepts of subband adaptive filters Subband Adaptive Filtering is aimed primarily at practicing engineers as well as senior undergraduate and graduate students It will also be of interest to researchers technical managers and computer scientists
