Fundamentals Of Fuzzy Sets The Handbooks Of Fuzzy Sets:

Fundamentals of Fuzzy Sets Didier Dubois, Henri Prade, 2012-12-06 Fundamentals of Fuzzy Sets covers the basic elements of fuzzy set theory Its four part organization provides easy referencing of recent as well as older results in the field The first part discusses the historical emergence of fuzzy sets and delves into fuzzy set connectives and the representation and measurement of membership functions The second part covers fuzzy relations including orderings similarity and relational equations The third part devoted to uncertainty modelling introduces possibility theory contrasting and relating it with probabilities and reviews information measures of specificity and fuzziness The last part concerns fuzzy sets on the real line computation with fuzzy intervals metric topology of fuzzy numbers and the calculus of fuzzy valued functions Each chapter is written by one or more recognized specialists and offers a tutorial introduction to the topics together with an extensive bibliography

Handbook of Granular Computing Witold Pedrycz, Andrzej Skowron, Vladik Kreinovich, 2008-07-31 Although the notion is a relatively recent one the notions and principles of Granular Computing GrC have appeared in a different guise in many related fields including granularity in Artificial Intelligence interval computing cluster analysis quotient space theory and many others Recent years have witnessed a renewed and expanding interest in the topic as it begins to play a key role in bioinformatics e commerce machine learning security data mining and wireless mobile computing when it comes to the issues of effectiveness robustness and uncertainty The Handbook of Granular Computing offers a comprehensive reference source for the granular computing community edited by and with contributions from leading experts in the field Includes chapters covering the foundations of granular computing interval analysis and fuzzy set theory hybrid methods and models of granular computing and applications and case studies Divided into 5 sections Preliminaries Fundamentals Methodology and Algorithms Development of Hybrid Models and Applications and Case Studies Presents the flow of ideas in a systematic well organized manner starting with the concepts and motivation and proceeding to detailed design that materializes in specific algorithms applications and case studies Provides the reader with a self contained reference that includes all pre requisite knowledge augmented with step by step explanations of more advanced concepts The Handbook of Granular Computing represents a significant and valuable contribution to the literature and will appeal to a broad audience including researchers students and practitioners in the fields of Computational Intelligence pattern recognition fuzzy sets and neural networks system modelling operations research and bioinformatics

Handbook of Categorization in Cognitive Science Henri Cohen, Claire Lefebvre, 2005-10-25 Categorization the basic cognitive process of arranging objects into categories is a fundamental process in human and machine intelligence and is central to investigations and research in cognitive science Until now categorization has been approached from singular disciplinary perspectives with little overlap or communication between the disciplines involved Linguistics Psychology Philosophy Neuroscience Computer Science Cognitive Anthropology Henri Cohen and Claire Lefebvre have gathered together a stellar

collection of contributors in this unique ambitious attempt to bring together converging disciplinary and conceptual perspectives on this topic Categorization is a key concept across the range of cognitive sciences including linguistics and philosophy yet hitherto it has been hard to find accounts that go beyond the concerns of one or two individual disciplines The Handbook of Categorization in Cognitive Science provides just the sort of interdisciplinary approach that is necessary to synthesize knowledge from the different fields and provide the basis for future innovation Professor Bernard Comrie Department of Linguistics Max Planck Institute for Evolutionary Anthropology Germany Anyone concerned with language semantics or categorization will want to have this encyclopedic collection Professor Eleanor Rosch Dept of Psychology University of California Berkeley USA
