Etkin, 2009-10-29 Ethnopharmacology is a component of Encyclopedia of Biological Physiological and Health Sciences in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias Ethnopharmacology is the scientific study correlating ethnic groups their health and how it relates to their physical habits and methodology in creating and using medicines This Theme on Ethnopharmacology presents the field as an amalgam of perspectives primarily those of

pharmacology pharmacognosy anthropology and botany It highlights the uniquely biocultural perspective on ethnopharmacology offered by medical anthropology which underscores that health and healing are culturally constructed and socially negotiated The definition of ethnopharmacology that frames this volume is the study of indigenous medical systems that connects the ethnography of health and healing with the physiological relevance of its medical practices The history of botanical medicines is traced from primate self medication to contributions to biomedicine The methods of ethnopharmacologic inquiry are presented from pharmacologic ecological ethnographic data management and ethical perspectives Chapters are devoted to plants used in the treatment of specific disorders cancer parasitic infection AIDS inflammation diabetes and cardiovascular and neurodegenerative disorders The important role that plant medicines play in the developing world is revealed in discussion of ritual and ceremony safety issues health care and biodiversity These two volumes are aimed at the following a wide spectrum of audiences from the merely curious to those seeking in depth knowledge University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs

Phytopharmacy Sarah E. Edwards, Ines da Costa Rocha, Elizabeth M. Williamson, Michael Heinrich, 2015-02-17 Healthcare professionals including doctors pharmacists and nurses are often confronted with patients who use over the counter OTC herbal medicinal products and food supplements While taking responsibility for one's own health and treatment options is encouraged many patients use these products based on limited and sometimes inaccurate information from non scientific sources such as the popular press and internet There is a clear need to offer balanced well informed advice to patients yet a number of studies have shown that generally conventionally trained health practitioners consider their knowledge about herbal medicinal products and supplements to be weak Phytopharmacy fills this knowledge gap and is intended for use by the busy pharmacist nurse or doctor as well as the expert patient and students of pharmacy and herbal medicine It presents clear practical and concise monographs on over a hundred popular herbal medicines and plant based food supplements Information provided in each monograph includes Indications Summary and appraisal of clinical and pre clinical evidence Potential interactions Contraindications Possible adverse effects An overview of the current regulatory framework is also outlined notably the EU Traditional Herbal Medicinal Products Directive This stipulates that only licensed products or registered traditional herbal medicinal products THRs which have assured quality and safety can now legally be sold OTC Monographs are included of most of the major herbal ingredients found in THRs and also some plant based food supplements which while not strictly medicines may also have the potential to exert a physiological effect
