**In Detail**

Meteor is best JavaScript development platform and is packed with collections of libraries and packages bound together in a tidy way to take care of everything from development to production making your web development easier

This course follows a learning path divided into three modules

Each module is a mini course in its own right taking your knowledge to a new level as you progress

The first module takes you from the installation of Meteor to building a fully working web blog including back end to create and edit posts

Your path will begin with the basic concepts and folder structure of a Meteor project learning how Meteor templates work to test packages and seeing the application itself

The second module is a cookbook that starts with simple recipes designed for quick reference and culminating advanced recipes that walk you through building and deploying a complete application

The cookbook covers all the major areas of Meteor development including lesser known and undocumented features too

With all the important concepts covered in the previous modules the third module will get you equipped with simple solutions to boost your development skills

You ll learn about mapping of real world data and optimizing it how to optimize and secure web applications and how to deploy and maintain it without breaking its features

Throughout the module you will put your skills into practice and build an online shop from scratch

This Learning Path combines some of the best that Packt has to offer in one complete curated package

It includes content from the following Packt products

- Building Single page Web Apps with Meteor Fabian Vogelsteller
- Meteor Cookbook Isaac Strack
- Meteor Design Patterns Marcelo Reyna
