Disability And Social Theory New Developments And Directions:

Disability and Social Theory D. Goodley, B. Hughes, L. Davis, 2012-06-01 This comprehensive interdisciplinary collection examines disability from a theoretical perspective challenging views of disability that dominate mainstream thinking Throughout social theories of disability intersect with ideas associated with sex gender race ethnicity class and nation

Learning Disability and Everyday Life Alex Cockain, 2024-03-29 Learning Disability and Everyday Life brings into conversation ideas from social theory with thick descriptions of the everyday life of a middle aged man with learning disabilities and autism This book is markedly ethnographic in its orientation to the gritty graininess of everyday life eating drinking walking cooking talking and so on in with and alongside learning disability However preoccupation with the small coexists with a gaze intent upon capturing a bigger picture to the extent that the things constituting everyday life are deployed as prisms through and with which to critically reflect upon the wider worlds of disability and everyday life Such attention to the small and the big the micro and the macro allows this book to explore the ordinary and everyday ways meanings about normalcy and abnormalcy ability and disability are put together enacted practised made up in the sense of constituting and fabricating and crucially accomplished through and between people in specific and invariably contingent sociocultural discursive and material conditions of possibility This book will be of specific interest not only to students and scholars of disability but also to persons with lived experiences of disability This book will also be of interest to students and scholars of anthropology and sociology

Disability and Discourse Analysis Jan Grue, 2016-05-23 Disability studies has engaged with discourse analysis in key works both from the UK and the USA While the perspectives and analyses of discourse analysis have proved well suited for exploring disability however its methods have not been sufficiently developed in a disability studies context Conversely discourse analysts have traditionally been concerned with social issues and fields in which asymmetric power relations marginalization and discrimination play a central role e g gender race ethnicity and sexual orientation all of which share many analytical features with disability But although efforts have been made to integrate disability into the discourse analysis and conversation analysis canon the link between the two fields needs to be strengthened This ground breaking volume contributes to this link by thoroughly applying the analytical vocabulary of discourse analysis to issues that are central to the field of disability studies It strengthens disability studies by supplying case studies of representations and constructions of disability and disabled people in discourse theorizes the role played by language in the social construction of disability and makes disability a more salient topic for discourse analysts

Manifestos for the Future of Critical Disability Studies Katie Ellis, Rosemarie Garland-Thomson, Mike Kent, Rachel Robertson, 2018-10-03 This collection identifies the key tensions and conflicts being debated within the field of critical disability studies and provides both an outline of the field in its current form and offers manifestos for its future direction Traversing a number of disciplines from science and technology studies to maternal studies the collection offers a

transdisciplinary vision for the future of critical disability studies Some common thematic concerns emerge across the book such as digital futures the usefulness of anger creativity family as disability allies intersectionality ethics eugenics accessibility and interdisciplinarity However the contributors who write as either disabled people or allies do not proceed from a singular approach to disability often reflecting different or even opposing positions on these issues Containing contributions from established and new voices in disability studies outlining their own manifesto for the future of the field this book will be of interest to all scholars and students working within the fields of disability studies cultural studies sociology law history and education The concerns introduced here are further explored in its sister volume **Interdisciplinary approaches to disability looking towards the future**

The Routledge Handbook of Postcolonial Disability Studies

Tsitsi Chataika, Dan Goodley, 2024-03-29 This book centres and explores postcolonial theory which looks at issues of power economics politics religion and culture and how these elements work in relation to colonial supremacy It argues that disability is a constitutive material presence in many postcolonial societies and that progressive disability politics arise from postcolonial concerns By drawing these two subjects together this handbook challenges oppression voicelessness stereotyping undermining neo colonisation and postcolonisation and bridges binary debate between global North and the global South The book is divided into eight sections Setting the Scene Decolonising Disability Studies Postcolonial Theory Inclusive Development Postcolonial Disability Studies and Disability Activism Postcolonial Disability and Childhood Studies Postcolonial Disability Studies and Education Postcolonial Disability Studies Gender Race and Religion Conclusion And comprised of 27 newly written chapters this book leads with postcolonial perspectives closely followed by an engagement with critical disability studies with the explicit aim of foregrounding these contributions pulling them in from the edges of empirical and theoretical work where they often reside in mainstream academic literature The book will be of interest to all scholars and students of disability studies and postcolonial studies as well as those working in sociology literature and development studies

Development and Disability Nicholas J. Anastasiow, 1986

Disability and Rehabilitation, 1997

Disability and Social Policy in Canada Mary Ann McColl, Lyn Jongbloed, 2006 Concise and accessible this book is the authoritative up to date resource for academics researchers students and professionals engaged in the field of disability and social policy This new edition moves beyond existing programs and history and focuses more on issues affecting policy and policy analysis It analyzes the current state and future prospects of disability policy at the beginning of the 21st century and attempts to identify directions for development and investment to ensure the best possible policy environment for disabled Canadians

Disability in Different Cultures Brigitte Holzer, Arthur Vreede, Gabriele Weigt, 1999 How are disability and rehabilitation conceived of in different cultures How can these concepts be made accessible Studies from the fields of sociology ethnology and educational science address these questions while contributors from rehabilitation projects in development cooperation and from self help movements highlight culturally different perceptions of disability A distinctive

feature of this volume is the dialogue it creates by bringing together scientific praxis and practical work This book is a collection of virtually all the contributions presented and discussed at the symposium Local Concepts and Beliefs about Disability in Different Cultures Here people with disabilities from both North and South met with special education professionals people working in development cooperation organizations and students and academics from different disciplines concerned with disability and started a dialogue which is reflected in this volume This dialogue which was initiated at the symposium should serve to continue in greater depth on the basis of this anthology The reader has the further aim of carrying the dialogue beyond the restricted circle of symposium participants and making it accessible and comprehensible to a wider public Disability in Different Cultures is an essential issue in development cooperation On the one hand disabilities whether physical mental or emotional can be seen as parameters for the structural disadvantaging and deficits of the countries with so called catching up development They are very frequently the results of hunger malnutrition and wars Thus NGOs are confronted with the issue of disability regardless of the social and economic areas with which they are concerned Another reason for addressing the issue of Disability in Different Cultures is that it is wide reaching even if it is evident at first glance and relates to the emancipatory potential of the topic In exploring the wide variety of local concepts of and different ideas and beliefs about disability it becomes strikingly clear just how differently a disability may be judged In this light disability can no longer be perceived as a physical psychological or mental characteristic that a person is born with or has acquired in the course of her or his life It becomes evident that to a large degree attitudes and interaction with others which are usual in the respective social context form and influences the nature and extent of a disability thereby determines the life of the disabled person
