Embracing Mind The Common Ground Of Science And Spirituality:

Embracing Mind B. Alan Wallace, Brian Hodel, 2008-12-23 What is Mind For this ancient question we are still seeking answers B Alan Wallace and Brian Hodel propose a science of the mind based on the contemplative wisdom of Buddhism Hinduism Taoism Christianity and Islam The authors begin by exploring the history of science showing how science tends to ignore the mind even while it is understood to be the very instrument through which we comprehend the world of nature They then propose a contemplative science of mind based on the sophisticated techniques of meditation that have been practiced for thousands of years in the great spiritual traditions The final section presents meditations that are of universal relevance to scientists and people of all faiths for revealing new dimensions of consciousness and human flourishing *Embracing Mind* moves us beyond the dogmatic debates between theists and atheists over Intelligent Design and Neo Darwinism and it returns us to the vital core of science and spirituality deepening our experience of reality as a whole

Embracing Mind B. Alan Wallace, Brian Hodel, 2008 Examines the integral link between science and spirituality in the two areas quest for ultimate truths arguing that science hampers its search by ignoring the human mind as the ultimate source of inspiration and the separation between the fields is unnecessary 15 000 first printing
