Elaine Rich Kevin Knight Artificial Intelligence Manual:

Multisensor Fusion: A Minimal Representation Framework Rajive Joshi, Arthur C Sanderson, 1999-12-13 The fusion of information from sensors with different physical characteristics such as sight touch sound etc enhances the understanding of our surroundings and provides the basis for planning decision making and control of autonomous and intelligent machines The minimal representation approach to multisensor fusion is based on the use of an information measure as a universal yardstick for fusion Using models of sensor uncertainty the representation size guides the integration of widely varying types of data and maximizes the information contributed to a consistent interpretation In this book the general theory of minimal representation multisensor fusion is developed and applied in a series of experimental studies of sensor based robot manipulation A novel application of differential evolutionary computation is introduced to achieve practical and effective solutions to this difficult computational problem

Paradigms of Artificial Intelligence Programming Peter Norvig, 2014-06-28 Paradigms of AI Programming is the first text to teach advanced Common Lisp techniques in the context of building major AI systems By reconstructing authentic complex AI programs using state of the art Common Lisp the book teaches students and professionals how to build and debug robust practical programs while demonstrating superior programming style and important AI concepts The author strongly emphasizes the practical performance issues involved in writing real working programs of significant size Chapters on troubleshooting and efficiency are included along with a discussion of the fundamentals of object oriented programming and a description of the main CLOS functions This volume is an excellent text for a course on AI programming a useful supplement for general AI courses and an indispensable reference for the professional programmer

Smart Technologies and Fundamental Rights John-Stewart Gordon, 2020-12-07 Smart Technologies and Fundamental Rights covers a broad range of vital topics that highlight the ethical socio political and legal challenges as well as technical issues of Artificial Intelligence with respect to fundamental rights Either humanity will greatly profit from the use of AI in almost all domains in human life which may eventually lead to a much better and more humane society or it could be the case that people may misuse AI for idiosyncratic purposes and intelligent machines may turn against human beings Therefore we should be extremely cautious with respect to the technological development of AI because we might not be able to control the machines once they reached a certain level of sophistication

Multiobjective Scheduling by Genetic Algorithms Tapan P. Bagchi, 2012-12-06 Multiobjective Scheduling by Genetic Algorithms describes methods for developing multiobjective solutions to common production scheduling equations modeling in the literature as flowshops job shops and open shops The methodology is metaheuristic one inspired by how nature has evolved a multitude of coexisting species of living beings on earth Multiobjective flowshops job shops and open shops are

each highly relevant models in manufacturing classroom scheduling or automotive assembly yet for want of sound methods they have remained almost untouched to date This text shows how methods such as Elitist Nondominated Sorting Genetic Algorithm ENGA can find a bevy of Pareto optimal solutions for them Also it accents the value of hybridizing Gas with both solution generating and solution improvement methods It envisions fundamental research into such methods greatly strengthening the growing reach of metaheuristic methods This book is therefore intended for students of industrial engineering operations research operations management and computer science as well as practitioners It may also assist in the development of efficient shop management software tools for schedulers and production planners who face multiple planning and operating objectives as a matter of course
