## **European Merger Control European Merger Control:**

European Merger Control Catalin Stefan Rusu, 2010-01-01 Twenty years of experience have inevitably brought to light challenges and tensions in the enforcement of the European merger control system Some of these challenges have been faced some have been solved and some remain latent This very valuable study starts from the proposition that the EU has never fully acknowledged those fundamental challenges which relate to the rationale behind merger control in Europe The author shows how the Commission's focus on adapting the rules of merger control to the economic realities of the future business environment although designed with a view to facilitating European integration has compromised attainment of legal certainty transparency and welfare enhancement In its detailed evaluation of the future market structure prediction process embedded in European merger control policy this book approaches two rock bottom far reaching questions In what ways does merger control promote consumer and societal welfare Is the Commission able to correctly predict the outcome of any given concentration transaction These considerations take the reader through a deep and searching analysis that calls into question the very credibility and transparency of the system leading to alternatives which promise a new clarity of purpose and procedure The author describes how these recommendations can be integrated into the functioning framework of the European project Taken fully into account along the way is a wide spectrum of relevant source material including the following applicable articles and chapters of the founding and subsequent European Treaties secondary European legislation concerning competition and merger activity domestic competition laws guidelines notices and action plans competition law reviews statements of intentions draft legislative attempts speeches on the enactment and purpose of merger control Member States views concerning European merger control as expressed during Council negotiations officially available concentration related statistics and a wide ranging literature review covering both the legal and economic sides of merger control Throughout the author substantiates theoretical assertions with case law examples clearly exposing doctrines arising from such cases as Continental Can Phillip Morris Rothmans and the Airtours Schneider and Tetra Laval trilogy A unique feature of the analysis draws on the author's personal experience while working for a Brussels competition law firm This book is a remarkable compound of academic guide to the roots and rationales of the European Merger Control System practical guide to the day to day intricacies of merger control enforcement and raw guide for decision makers and merger control law enforcers It will be of immense value in all three contexts

*Law and Economics in European Merger Control* Ulrich Schwalbe, Daniel Zimmer, 2009-10 Co written by an expert lawyer and economist this book provides a thorough guide to the economic theory behind the regulation of mergers The economic theory is then used to analyse the current state of European competition law and test the success of the European Commission's search for a more economic approach to merger regulation

**The EU Merger Regulation** Alistair Lindsay, Alison Berridge, 2012 This is the 4th edition of The EC Merger Regulation a detailed guide to the method of merger control in the European Union Fully revised for 2012 this

comprehensive text describes how the European Commission determines approval of a notified merger thereby providing information and techniques to complete merger deals successfully for companies operating in the European Union

**Does EU Merger Control Discriminate against Small Market Companies?** Mika Oinonen, 2010-07-20 Although the question posed by the title of this book has generated considerable debate the essential issue remains open and largely blurred While some believe that there is no so called small market problem others discern discrimination against small market companies i.e. companies with a strong position in their home markets but a modest position in the European and global markets and a consequent need for changes in competition law The author of this enormously helpful work here sets the stage for meaningful discussion by analysing the EC Merger Regulation's objectives economic foundations and application practice to present a reasoned view of the issues that can be considered relevant for such a discussion Considering their effect on the small market problem the author scrutinizes such factors as the following the Commission's methodology for delineating relevant markets in merger assessments unnecessary prohibition caused by overestimation of the market power of small market mergers erroneous approval of cases that should actually be prohibited impact of the so called Harvard and Chicago schools of competition theory and their key policy implications process related alternative views of competition and new synthesizing approaches relevant criteria for a proper analysis of market power concentration measures and market shares barriers to entry price and profitability analyses and product definition v geographic definition of markets In a final chapter the author presents some tentative conclusions normative in nature concerning the problem and the relevant issues relating to it As the first in depth analysis of the issues that are actually involved with its particular diagnosis of the assessment of market power in considering the relevant issues for the problem this study brings into salience the terms of the debate on the problem and thus takes a giant step forward towards defining what needs to be done Competition lawyers policymakers and academics in Europe and elsewhere will find the discussion of great value

**Merger Control in the European Union**

Eduard Navarro Varona, 2005 This second edition of Merger Control in the EU provides the reader with an exhaustive analysis of the European Community rules relating to merger control including the new EC Merger Regulation 139/2004 of 20 January 2004 which entered into force on 1 May 2004 and the latest interpretive notices adopted by the European Commission A brand new addition to the book is the companion website which will maintain the currency of the main work after publication a service that is free of charge to all who own a copy of the book The European Commission has exclusive competence to authorise or prohibit concentrations which have a Community dimension Bearing in mind the economic relevance of these operations decisions made by the Commission have an extraordinary market impact This work is an invaluable and precise instrument for legal practitioners and economists as well as for those undertakings involved in merger operations or acquisitions It will enable them to become acquainted with the Commission's policy in this field and to guide themselves through the complex procedure of notification in Brussels It will also be useful for those merger operations which

are required to follow the procedure of notification to the national competition authorities in EU Member States since the Commission's guidelines inspire to a large extent the acts and decisions of the national authorities in this field. This book analyses the issues related to merger control not only from a legal standpoint but also from an economic one. It is a product of the authors' knowledge and experience in Brussels as officials of DG Competition in the Commission and as lawyers defending the interests of undertakings involved in the notification procedure.

**European Merger Control** Michael Rosenthal, Stefan Thomas, 2010-01-01 European merger control is among the most important and complex aspects of competition law. The rapid pace of development in this area presents a further challenge: legislation and guidance documents are frequently issued and updated and the formidable body of Court and Commission case law continues to grow at a daunting rate. This book provides a comprehensive treatment of EC merger control law and procedure. It adopts an integrated approach that embraces both the law and economics of merger control, supplemented throughout with practical insights drawn from the authors' own experience. The book blends practical and academic perspectives and addresses new and unsolved questions of EC merger control law. Highlights: Specific and detailed treatment of EC merger control. Comprehensive and up-to-date overview of recent case law and Commission guidance. Detailed analysis of economic issues posed by the ECMR e.g. market definition and SIEC test.

*Making European Merger Policy More Predictable* Stefan Voigt, André Schmidt, 2005 Analyses European Merger Control with regard to its capacity to generate predictability among the concerned parties. The authors show both theoretically and empirically that there have been serious shortcomings with regard to the predictability of competition policy. They assess the reforms of European Merger Control.

**European Merger Control Law** Nicholas Levy, 2002-12-31 Written by an expert in the area of competition law, this comprehensive and up-to-date analysis of all aspects of merger regulation provides full coverage of the substantive law with expert insights into its application and enforcement and is updated annually. Extensive supporting materials and time-saving practice tips, checklists and primary sources should make this a useful addition to your library.

combinations between companies doing business in the European Union. **European Merger Control Law: A Guide to the Merger Regulation** is an indispensable guide to this process. Topics covered include: history of the European Community's merger control regulation; concentrations subject to the merger control regulation; division of powers between the EC and its member states; notification and administrative procedures; defenses; remedies; international cooperation; US merger control; role of economics in European merger control; competition law issues in the mergers and acquisitions deal process.

*Merger in Daylight* Damien J. Neven, Robin Nuttall, Paul Seabright, 1993 In this recent volume the authors react to the latest development in the European Community: the EC Merger Regulation approved by the European Council of Ministers and analyze how this decision will impact mergers and regulation in the future for Europe.

European Merger Control Peter D. Camesasca, 2000 The first decade of merger control under European competition law offers an enticing stimulus for all kinds of evaluations on the Merger Regulation's

running time in particular into the economic feasibility of its rules and their application An economic analysis of the Regulation allows for a positive assessment of the envisioned effects while also enabling normative statements on how to improve the rules workability given a number of goals to be achieved This study was inspired by one of the Merger Regulation s more controversial issues as surrounding the taking into account of efficiencies resulting from a merger under scrutiny Currently hardly featured in the evaluation process it will be shown that efficiencies carry the potential to move to the centre of stage in those competitively close cases pending prohibition because of the underlying amalgamation s latent anticompetitive effects but at the same time characterised by a strong synergistic content Roberto Pardolesi Luiss Guido Carli Rome The major strength of the work is the original development of fresh insights in discussing existing literatures as well as in applying sophisticated economic arguments to the analysis of European discipline of Merger Control The comparison with the US legal and economic approach to merger regulation is pervasive and efficaciously performed

**European Merger Control** Klaus J. Hopt, 2019-07-22 No detailed description available for European Merger Control

*EC Merger Control* Götz Drauz, Michael Reynolds, 2003 The European Commission adopted a comprehensive package of reforms to the EU merger control regime in conjunction with the accession of the new Member States in 2004 This constituted the most radical reform of the regime since the previous Merger Regulation was adopted in 1989 aimed at better adapting it to a globalizing market and enlarging an increasingly integrated European Union The extensive reform to the regulation has provoked significant questions about the way in which the Commission treats major merger evaluations EC Merger Control provides a comprehensive and insightful account of the many important procedural and substantive aspects of the reform process with contributions from eminent specialists in the field of mergers including lawyers economists and representatives of the European Commission Court of First Instance US Department of Justice the World Bank and several competition authorities The papers in this book are based on the proceedings of the 2002 EC Merger Control conference organised jointly by the European Commission and the International Bar Association *Merger Control in Europe* Nauta Dutilh, 2003-01-01 Rev edition of Merger control in the EU edited by Peter Verloop 3rd rev ed 1999 European Merger Control Ovidiu Ioan Dumitru, 2020-09-18 Modern European Merger Control Policy is the result of a compelling evolution as throughout the course of time the underlying objectives guiding its enforcement have been influenced by different school of thoughts decisions of the bodies supervising the competition Commission at EU level and national authorities at the state level and of course the economic evolution of the continent As a consequence the European institutions together with the Member States had to amend the initial provisions from the Treaty and later from the specific Regulation This book aims at studying the evolution of the European Merger Control rules from the founding treaties till the last European act providing it in parallel analysing the caselaw in the field and its influence in the reformation process The final Reform of the European Merger Control was implemented in 2004 as a consequence of globalization and rapid developments of the markets including

the digital economy as some amendments were essential for a competitive and innovative European single market leaving us with a amended procedure which is presented in the present book

**European Merger Control** F. Ilzkovitz, Roderick Meiklejohn, 2006 During its first 15 years the EU s merger control system offered only minimal possibilities for taking efficiency gains into account as a mitigating factor that might offset the anti competitive effects of a merger The policy changed in May 2004 and this book examines the background to that change

*Industrial Policy and European Merger Control* Damien M.B. Geradin, Janis Girgenson, 2011 The relationship between industrial policy and merger control is one of the most controversial topics in European competition law The debate has become particularly intense in recent years given the perceived failure of free markets and the return of government intervention into the economy In Europe the concepts of industrial policy and competition policy conjure up a great ideological divide Modern competition policy is inspired by the neoliberal ideas of the Chicago school that place great confidence in free markets Industrial policy reflects a more interventionist approach based on the assumption that markets are fallible and that governments should correct their imperfections Industrial policy dominated the early years of European merger control However following the adoption of the Merger Regulation in 1989 the European Commission largely ignored industrial policy considerations focusing instead on the strict implementation of the competition based test This approach was unsurprising given the triumph of the neoliberal agenda and the corresponding lack of interest in or support for industrial policy However the challenges of globalisation and the 2008 economic crisis inspired a growing number of observers to argue for an increased intervention of public authorities into the economy The role of competition policy has also been called into question In particular some observers argued that EU merger control prevented industrial consolidation In several recent cases national governments set aside merger control rules to facilitate the creation of national champions or used them as a protectionist tool to disrupt undesirable transactions Against this background we seek to address the issue of whether merger control rules should be relaxed in order to accommodate industrial policy objectives

Editor **EU Competition Law Volume II: Mergers and Acquisitions** Jones, Christopher, Weinert, Lisa, 2021-12-14 This book is a Claey's and Casteels title now formally part of Edward Elgar Publishing With extensive updating in the decade since the publication of the second edition and written by the key Commission and European Court officials in this area as well as leading practitioners the third edition of this unique title provides meticulous and exhaustive coverage of EU Merger Law

**Chinese State Owned Enterprises and EU Merger Control** Alexandr Svetlicinii, 2020-12-13 This book analyzes the specifics of corporate governance of China s State Owned Enterprises SOEs and their assessment under EU merger control which is reflected in the EU Commission s screening of the notified economic concentrations Guided by the going global policy and the Belt and Road Initiative Chinese SOEs have expanded their global presence considerably Driven by the need to acquire cutting edge technologies and other industrial policy considerations Chinese SOEs have engaged in a series of corporate acquisitions in Europe The main objective of this book is to demonstrate

the conceptual and regulatory challenges of applying traditional merger assessment tools in cases involving Chinese SOEs due to the specifics in their corporate governance and the regulatory framework under which they operate in China The book also explores the connection between the challenges experienced by the merger control regimes in the EU and the recent introduction of the EU foreign direct investment screening framework followed by a proposal concerning foreign subsidies The book will be a useful guide for academics and researchers in the fields of law international relations political science and political economy legal practitioners dealing with cross border mergers and acquisitions national competition authorities and other public bodies carrying out merger control policy makers government officials and diplomats in China and the EU engaged in bilateral economic relations

**How Effective is European Merger Control?** Tomaso Duso, Klaus Peter Gugler, B. Burcin Yurtoglu, 2008 This paper applies a novel and intuitive approach based on stock market data to a unique dataset of large concentrations during the period 1990-2002 to assess the effectiveness of European merger control We analyze the economic effects of the European Commission's merger control decisions and distinguish between prohibitions clearances with commitments either behavioral or structural and outright clearances We run an event study on merging and rival firms stock prices to quantify the profitability effects of mergers and merger control decisions The basic idea is to relate announcement and decision abnormal returns merger control is effective if anticompetitive rents observed around the merger announcement are reversed by the antitrust decision i.e. if there is a negative relation between announcement and decision abnormal returns Our findings suggest that only outright prohibitions completely solve the competitive problems generated by the merger Remedies are on average not effective in solving anticompetitive concerns yet we can qualify this finding Remedies are more effective when they are applied during the first rather than the second investigation phase Moreover the European Commission appears to learn over time since remedies are on average more effective in industries where they have been intensively applied before

**Merger Control in Post-Communist Countries** Jurgita Malinauskaite, 2010-11-01 This book provides a critical analysis of merger control regimes in the former socialist countries with small market economies looking at the unique challenges facing these economies Questions will be asked as to what extent these countries have had to follow dictation from the EU and whether this implementation of EU merger control rules has been justified from the point of view of these countries economic situations The book will analyse the merger control regimes in Estonia Latvia and Lithuania Slovenia and Slovakia However reference will be made to other small market economies of the EU including Cyprus Ireland Luxembourg and Malta in order to evaluate the particular difficulties the former socialist countries with small market economies have had in the implementation and further development of merger control rules
