 a one or two semester course in environmental science human ecology or environmental studies at the college or advanced  
 placement high school level Because most students who will use this book are freshman or sophomore nonscience majors the  
 authors have tried to make the text readable and accessible without technical jargon or a presumption of prior science  
 background At the same time enough data and depth are presented to make this book suitable for many upper division  
 classes and a valuable resource for students who will keep it in their personal libraries after their formal studies are  
 completed The goal of this book is to provide an up to date introductory view of essential themes in environmental science  
 along with emphasis on details and case studies that will help students process and retain the general principles      **Living**
