Evolutionary Algorithms For Embedded System Design Genetic Algorithms And Evolutionary Computation:

Evolutionary Algorithms for Embedded System Design Rolf Drechsler, Nicole Drechsler, 2012-12-06 Evolutionary Algorithms for Embedded System Design describes how Evolutionary Algorithm EA concepts can be applied to circuit and system design an area where time to market demands are critical EAs create an interesting alternative to other approaches since they can be scaled with the problem size and can be easily run on parallel computer systems This book presents several successful EA techniques and shows how they can be applied at different levels of the design process Starting on a high level abstraction where software components are dominant several optimization steps are demonstrated including DSP code optimization and test generation Throughout the book EAs are tested on real world applications and on large problem instances For each application the main criteria for the successful application in the corresponding domain are discussed In addition contributions from leading international researchers provide the reader with a variety of perspectives including a special focus on the combination of EAs with problem specific heuristics Evolutionary Algorithms for Embedded System Design is an excellent reference for both practitioners working in the area of circuit and system design and for researchers in the field of evolutionary concepts

Frontiers of Evolutionary Computation Anil Menon, 2006-04-11 Frontiers of Evolutionary Computation brings together eleven contributions by international leading researchers discussing what significant issues still remain unresolved in the field of Evolutionary Computation Ee They explore such topics as the role of building blocks the balancing of exploration with exploitation the modeling of EC algorithms the connection with optimization theory and the role of EC as a meta heuristic method to name a few The articles feature a mixture of informal discussion interspersed with formal statements thus providing the reader an opportunity to observe a wide range of EC problems from the investigative perspective of world renowned researchers These prominent researchers include Heinz M hlenbein Kenneth De Jong Carlos Cotta and Pablo Moscato Lee Altenberg Gary A Kochenberger Fred Glover Bahram Alidaee and Cesar Rego William G Macready Christopher R Stephens and Riccardo Poli Lothar M Schmitt John R Koza Matthew J Street and Martin A Keane Vivek Balaraman Wolfgang Banzhaf and Julian Miller *Applications of Evolutionary Computing* Franz Rothlauf, 2006-03-31 EvoWorkshops 2006 of which this volume contains the proceedings was held in Budapest Hungary on April 10 12 2006 jointly with EuroGP 2006 and EvoCOP 2006

Application of Evolutionary Algorithms for Multi-objective Optimization in VLSI and Embedded Systems M.C. Bhuvaneshwari, 2014-08-20 This book describes how evolutionary algorithms EA including genetic algorithms GA and particle swarm optimization PSO can be utilized for solving multi objective optimization problems in the area of embedded and VLSI system design Many complex engineering optimization problems can be modelled as multi objective formulations This book provides an introduction to multi objective optimization using meta heuristic algorithms GA and PSO and how they can be applied to problems like hardware software partitioning in embedded systems circuit partitioning in VLSI design of operational amplifiers in analog VLSI design space

exploration in high level synthesis delay fault testing in VLSI testing and scheduling in heterogeneous distributed systems It is shown how in each case the various aspects of the EA namely its representation and operators like crossover mutation etc can be separately formulated to solve these problems This book is intended for design engineers and researchers in the field of VLSI and embedded system design The book introduces the multi objective GA and PSO in a simple and easily
