In other words, if you can imagine it, you can become it. Athletes, dancers, and fitness experts have used sophisticated mental imagery to enhance their performance, and now you can too. The Franklin Method, developed by author Eric Franklin, combines movement and Dynamic Neurocognitive Imagery (DNI) to harness the transforming power of the mind to move efficiently and keep the physical body young and energized. With the power to change the body from the inside out, imagery can influence and rejuvenate everything from individual cells to the immune system and organs, showing that remaining young is largely a question of attitude. Grow Younger Daily provides a roadmap to creating lasting positive physical and mental changes by describing how to harness the plasticity and transformative power of the mind, thanks to the author's decades of firsthand experience and practice. Acknowledging the power of change is the first step to a younger, healthier you.
