100

It's possible by means of Electronic chokes, otherwise it's not possible to ionize the particles in tube light with normal voltage.

3. What is "pu" in electrical engineering?

Pu stands for per unit and this will be used in single line diagram of power distribution and it is like a huge electrical circuit with no of components (generators, transformers, loads) with different ratings (in MVA and KV). To bring all the ratings into common platform we use pu concept in which, in general largest MVA and KV ratings of the component is considered as base values, then all other component ratings will get back into this basis. Those values are called as pu values. (pu=actual value/base value).
