Immigration and Categorical Inequality Ernesto Castañeda, 2017-09-13 Immigration and Categorical Inequality explains the general processes of migration the categorization of newcomers in urban areas as racial or ethnic others and the mechanisms that perpetuate inequality among groups Inspired by the pioneering work of Charles Tilly on chain migration transnational communities trust networks and categorical inequality renowned migration scholars apply Tilly's theoretical concepts using empirical data gathered in different historical periods and geographical areas ranging from New York to Tokyo and from Barcelona to Nepal The contributors of this volume demonstrate the ways in which social boundary mechanisms produce relational processes of durable categorical inequality This understanding is an important step to stop treating differences between certain groups as natural and unchangeable This volume will be valuable for scholars students and the public in general interested in understanding the periodic rise of nativism in the United States and elsewhere

Nepal's community-managed forest enterprises Adhikary, A.,Jhaveri, N.,Karki, R.,Paudel, N.S.,2019-11-22 Forest rights devolution in Nepal from the late 1980s created different types of community based forest management institutions in particular community forestry user groups Effective forest regeneration led to a new focus on entrepreneurial opportunities for improving livelihoods and social equity resulting in considerable if unstable enterprise growth Employing the concept of enabling and asset investments the study examines how user groups have established and managed forest based enterprises taking account of regulatory and non regulatory factors The study is based on primary data from interviews with 12 community managed forest enterprises as well as secondary data from the published government and grey literature In light of the high export demand for non timber forest products from India and elsewhere there has been gradual policy support for enterprise development from the government Enabling investments by the government donors and non governmental organizations have built momentum and contributed to success Forest based enterprises have the potential to change the face of Nepal s rural economy However complex and poorly harmonized regulatory requirements have kept many community managed forest enterprises in a state of informality and unable to attract asset investment An emerging second generation of community managed forest enterprises can benefit from reductions in regulatory burdens and attract asset investments capable of overcoming current obstacles to growth *The Handbook of Contemporary Cambodia* Katherine Brickell,Simon

Springer,2016-09-13 Offering a comprehensive overview of the current situation in the country The Handbook of Contemporary Cambodia provides a broad coverage of social cultural political and economic development within both rural and urban contexts during the last decade A detailed introduction places Cambodia within its global and regional frame and the handbook is then divided into five thematic sections Political and Economic Tensions Rural Developments Urban Conflicts Social Processes Cultural Currents The first section looks at the major political implications and tensions that have occurred in Cambodia as well as the changing parameters of its economic profile The handbook then highlights the major developments that are unfolding within the rural sphere before moving on to consider how cities in Cambodia and particularly Phnom Penh have become primary sites of change The fourth section covers the major processes that have shaped social understandings of the country and how Cambodians have come to understand themselves in relation to each other and the outside world Section five analyses the cultural dimensions of Cambodia s current experience and how identity comes into contact with and responds to other cultural themes Bringing together a team of leading scholars on Cambodia the

Pattillo,2007-02 This paper assesses the impact of the steadily growing remittance flows to sub Saharan Africa SSA Though the region receives only a small portion of the total recorded remittances to developing countries and the volume of aid flows to SSA swamps remittances this paper finds that remittances which are a stable private transfer have a direct poverty mitigating effect and promote financial development These findings hold even after factoring in the reverse causality between remittances poverty and financial development The paper posits that formalizing such flows can serve as an effective access point for unbanked individuals and households and that the effective use of such flows can mitigate the costs of skilled out migration in SSA International Labour Documentation International Labour Organization.
