unprecedented training and operational challenge never experienced in GA The Pilot's Manual Access to Flight has been specifically crafted to meet this challenge making use of methods that will allow pilots to obtain the maximum safety and utility from their aircraft For the first time ever private pilot and instrument rating curriculums are integrated so pilots flying TAA learn to intrinsically manage the combined skills of aircraft control task management systems management and the complex flight environment of today's busy airspace This is a very different approach from the practice of traditional maneuver based flight training used heretofore With a realization of the inadequacy of maneuver based training as applied to TAA The Pilot's Manual Access to Flight embodies the state of the art industry training standards of scenario based training SBT learner centered grading and involvement and single pilot resource management SRM These are real world skills taught with a train like you fly fly like you train philosophy treating each and every lesson as a real flight This is where harnessing the power of all available resources and aeronautical decision making ADM become second nature Whereas maneuver based training focused specifically on simply learning to control the aircraft this new methodology involves considering an entire flight and all its component aspects from beginning to end **The Thinking Pilot's Flight Manual** Rick Durden, 2012

Volume 2 of The Thinking Pilot's Flight Manual carries on the widely praise penetrating and clear headed approach of Volume I addressing matters of importance to pilots that ordinary flight training manuals never touch It delves into everything from the realities of making the go no go decision during the takeoff roll nailing spot landings which emergencies to practice and how to take babies and kids flying It explores how we scare our passengers without realizing it IFR training in IMC and takes a hard look at spin training Back cover of volume 2
