**The Scientific Revolution** Lawrence M.

Principe, 2011-04-28 The sixteenth and seventeenth centuries witnessed such fervent investigations of the natural world that the period has been called the Scientific Revolution. New ideas and discoveries not only redefined what human beings believed, knew, and could do but also forced them to redefine themselves with respect to the strange new worlds revealed by ships and scalpels, telescopes and microscopes, experimentation and contemplation. Driven by religious devotion, by practical need, by the promise of fame and profit, or by the simple desire to know, a broad range of thinkers and workers explored and reconceptualized the world around them. Explanatory systems were made, discarded, and remade by some of the best known names in the entire history of science: Copernicus, Galileo, Newton, and by many others less recognized but no less important. In this Very Short Introduction, Lawrence M. Principe explores the exciting developments in the sciences of the stars—astronomy, astrology, and cosmology; the sciences of earth—geography, geology, hydraulics, pneumatics; the sciences of matter and motion—alchemy, chemistry, kinematics, physics; the sciences of life—medicine, anatomy, biology, zoology; and much more. The story is told from the perspective of the historical characters themselves, emphasizing their background, context, reasoning, and motivations, and dispelling well-worn myths about the history of science.

**ABOUT THE SERIES** The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

**Galileo** Mitch Stokes, 2011-04-11 We learn about life through the lives of others. Their experiences, their trials, their adventures become our schools, our chapels, our playgrounds. *Christian Encounters*, a series of biographies from Thomas Nelson Publishers, highlights important lives from all ages and areas of the Church, through prose as accessible and concise as it is personal and engaging. Some are familiar faces. Others are unexpected guests. Whether the person is Galileo, William F. Buckley, John Bunyan, or Isaac Newton, we are now living in the world that they created and understand both it and ourselves better in the light of their lives. Their relationships, struggles, prayers, and desires uniquely illuminate our shared experience.

**HERO OR HERETIC? GENIUS OR BLASPHEMER?** It's no mystery how profound a role Galileo played in the Scientific Revolution. Less explored is the Italian innovator's sincere guiding faith in God. In this exhaustively researched biography that reads like a page-turning novel, Mitch Stokes draws on his expertise in philosophy, logic, math, and science to attune modern ears with Galileo's controversial genius. Emerging from the same Florentine milieu that produced Dante, da Vinci, Machiavelli, Michelangelo, Amerigo Vesputi, Galileo questioned with a persistence that spurred his world toward an unabating era of discovery. Stokes confronts the myth that Galileo's stance on heliocentricity stood astride a church vs. science divide and explores his calculations for the dimensions of Dante's hell, his understanding of motion, and his invention of the pendulum clock. To read this volume is to journey through Galileo's remarkable life from his inquisitive childhood to his dying days, when, although blind and decrepit, he soldiered on dictating mathematical thoughts and mentoring young proteges.
