Fuzzy-Neuro Approach to Agent Applications Raymond S.T. Lee, 2005-11-18 Complete course on Intelligent Agent or AI with focus on contemporary and latest AI technologies and development Companion technical reference for agent developers researchers who would like to adopt the iJADK toolkit to develop their own agent based applications and projects The advanced section on modern ontology and ontological agents serves as research literature for AI researchers who would like to explore the advanced AI agent topics that involve the contemporary research on ontological agents and applied ontology

Fuzzy-Neuro Approach To Agent Application: From The Ai Perspective To Modern Ontology Raymond S.T. Lee, 2008-08-01 Fuzzy-Neuro Approach to Agent Applications Raymond S.T. Lee, 2006-03-28 Anything happens must have its own reason Although I cannot really recall exactly when I heard of this statement for the first time it is always in my mind and in fact it has been one of the motivations for me to carry out research and study When I asked myself again about the purpose of writing this book at the time of writing this preface several add on reasons that had never occurred to me at the start of writing this book in the spring of 2003 surprisingly came up Back then when I was preparing the progress report for the iJADE 2.0 project a fuzzy idea of whether it was feasible to write a book on intelligent agents came to my mind This book not only would discuss and deal with the theory but also the spin off applications from the iJADE project including the iJADE WeatherMan the iJADE Stock Advisor the iJADE Surveillant and the latest works on iJADE Negotiator The fact that I had to launch the iJADE development kit officially over the Web in the summer of 2003 <http://www.ijadk.org> and to arrange courses and seminars to teach and train our undergraduate students to make use of this tool kit further supported the idea and the future use of this book Hence the archetype of this book emerged *Quantum Finance* Raymond S. T. Lee, 2019-11-15 With the exponential growth of program trading in the global financial industry quantum finance and its underlying technologies have become one of the hottest topics in the fintech community Numerous financial institutions and fund houses around the world require computer professionals with a basic understanding of quantum finance to develop intelligent financial systems This book presents a selection of the author's past 15 years R D work and practical implementation of the Quantum Finance Forecast System which integrates quantum field theory and related AI technologies to design and develop intelligent global financial forecast and quantum trading systems The book consists of two parts Part I discusses the basic concepts and theories of quantum finance and related AI technologies including quantum field theory quantum price fields quantum price level modelling and quantum entanglement to predict major financial events Part II then examines the current ongoing R D projects on the application of quantum finance technologies in intelligent real time financial prediction and quantum trading systems This book is both a textbook for undergraduate masters level quantum finance AI and fintech courses and a valuable resource for researchers and data scientists working in the field of quantum finance and intelligent financial systems It is also of interest to professional traders quants independent investors who would like to grasp the basic concepts and theory of

quantum finance and more importantly how to adopt this fascinating technology to implement intelligent financial forecast and quantum trading systems For system implementation the interactive quantum finance programming labs listed on the Quantum Finance Forecast Centre official site QFFC org enable readers to learn how to use quantum finance technologies presented in the book **Knowledge Seeker - Ontology Modelling for Information Search and Management** Edward H. Y. Lim,James N. K. Liu,Raymond S.T. Lee,2011-01-31 The Knowledge Seeker is a useful system to develop various intelligent applications such as ontology based search engine ontology based text classification system ontological agent system and semantic web system etc The Knowledge Seeker contains four different ontological components First it defines the knowledge representation model V Ontology Graph Second an ontology learning process that based on chi square statistics is proposed for automatic learning an Ontology Graph from texts for different domains Third it defines an ontology generation method that transforms the learning outcome to the Ontology Graph format for machine processing and also can be visualized for human validation Fourth it defines different ontological operations such as similarity measurement and text classification that can be carried out with the use of generated Ontology Graphs The final goal of the KnowledgeSeeker system framework is that it can improve the traditional information system with higher efficiency In particular it can increase the accuracy of a text classification system and also enhance the search intelligence in a search engine This can be done by enhancing the system with machine processable ontology Modern Engineering Mathematics Abul Hasan Siddiqi,Mohamed Al-Lawati,Messaoud Boulbrachene,2017-12-22 This book is a compendium of fundamental mathematical concepts methods models and their wide range of applications in diverse fields of engineering It comprises essentially a comprehensive and contemporary coverage of those areas of mathematics which provide foundation to electronic electrical communication petroleum chemical civil mechanical biomedical software and financial engineering It gives a fairly extensive treatment of some of the recent developments in mathematics which have found very significant applications to engineering problems **Artificial Intelligence in Daily Life** Raymond S. T. Lee,2020-08-22 Given the exponential growth of Artificial Intelligence AI over the past few decades AI and its related applications have become part of daily life in ways that we could never have dreamt of only a century ago Our routines have been changed beyond measure by robotics and AI which are now used in a vast array of services Though AI is still in its infancy we have already benefited immensely This book introduces readers to basic Artificial Intelligence concepts and helps them understand the relationship between AI and daily life In the interest of clarity the content is divided into four major parts Part I AI Concepts presents fundamental concepts of and information on AI while Part II AI Technology introduces readers to the five core AI Technologies that provide the building blocks for various AI applications namely Machine Learning ML Data Mining DM Computer Vision CV Natural Languages Processing NLP and Ontology based Search Engine OSE In turn Part III AI Applications reviews major contemporary applications that are impacting our ways of life working styles and environment ranging from intelligent agents and robotics

to smart campus and smart city projects Lastly Part IV Beyond AI addresses related topics that are vital to the future development of AI It also discusses a number of critical issues such as AI ethics and privacy the development of a conscious mind and autonomous robotics in our daily lives **The British National Bibliography** Arthur James Wells,2006
