## **Enhancing Access To Information Designing Catalogs For The 21st Century:**

**Enhancing Access to Information** David A. Tyckoson, 1996 Enhancing Access to Information addresses the problem when a library has limited catalog access It discusses the various technological possibilities to help the cataloger once again cover the entire collection with his system For centuries the catalog has served as the primary access point to the information sources of a particular library The principal role of the catalog has been to index and describe the information contained within the library's collection However despite all of the advancements in modern technology today's library catalog system tends to index only a very small percentage of the library's comprehensive collection The ability to expand the catalog beyond its traditional boundaries is now within our grasp and this volume explores several ways to do it The chapters cover a wide range of methods for improving access to information by building upon the existing catalog Topics covered include enhancing access to existing records adding databases for materials not traditionally included in the catalog improving search software enhancing the user interface and linking a diverse array of library systems Several reports come from libraries that have already taken the initial steps toward reclaiming the role of the catalog as the complete index to the collection This inspiring book encourages others to explore new ways of improving access through the catalog

**Digital Library Use** Ann Peterson-Kemp, Nancy A. Van House, Barbara P. Battenfield, 2003-10-10 Viewing digital libraries as sociotechnical systems networks of people and technology interacting with society The contributors to this volume view digital libraries DLs from a social as well as technological perspective They see DLs as sociotechnical systems networks of technology information artifacts and people and practices interacting with the larger world of work and society As Bruce Schatz observes in his foreword for a digital library to be useful the users the documents and the information system must be in harmony The contributors begin by asking how we evaluate DLs how we can understand them in order to build better DLs but they move beyond these basic concerns to explore how DLs make a difference in people's lives and their social worlds and what studying DLs might tell us about information knowledge and social and cognitive processes The chapters using both empirical and analytical methods examine the social impact of DLs and also the web of social and material relations in which DLs are embedded these far ranging social worlds include such disparate groups as community activists environmental researchers middle school children and computer system designers Topics Documents and society the real boundaries of a library without walls the ecologies of digital libraries usability and evaluation information and institutional change transparency as a product of the convergence of social practices and information artifacts and collaborative knowledge construction in digital libraries
