Laboratory Manual for Entomology and Plant Pathology Louis Pyenson, Harvey E. Barké, 1981 The second edition of this widely used manual has been revised and updated Some drawings and illustrations have been replaced and new ones added

Suggestions have been made to divide the manual into two separate editions one on the study of insects and related forms the other on the study of plant diseases However many of the studies involve both these fields of plant protection The authors believe that in an applied introductory course their integration gives the students a much broader basis of understanding the problems involved in diagnosing and controlling plant health problems We therefore have decided to retain the integrated format
