Environment Development And Human Security Perspectives From South Asia:

Environment, Development and Human Security Adil Najam, 2003-05-05 The purpose of this collected volume of essays is to build on and contribute to the larger conceptual literature on environment and security In particular the book seeks to fill one of the glaring gaps within this stream of scholarship the inadequate number of existing case studies for South Asia and its component territories Written entirely by the leading scholars from South Asia the book examines a region that is the setting for some of the most important environmental security challenges of our time **Environmental Change and Security Project Report**, 2003 Routledge Handbook of Peace, Security and Development Fen Osler Hampson, Alpaslan Özerdem, Jonathan Kent, 2020-06-04 This Handbook offers a comprehensive examination of the peace security and development nexus from a global perspective and investigates the interfaces of these issues in a context characterised by many new challenges By bringing together more than 40 leading experts and commentators from across the world the Handbook maps the various research agendas related to these three themes taking stock of existing work and debates while outlining areas for further engagement In doing so the chapters may serve as a primer for new researchers while also informing the wider scholarly community about the latest research trends and innovations The volume is split into three thematic parts Concepts and approaches New drivers of conflict insecurity and developmental challenges Actors institutions and processes For ease of use and organisational consistency each chapter provides readers with an overview of each research area a review of the state of the literature a summary of the major debates and promising directions for future research This Handbook will be of much interest to students of peace and conflict studies development studies security studies and International Relations **Non-traditional and Human Security in South Asia**, 2006 **Globalization and Environmental Challenges** Hans Günter Brauch, Úrsula Oswald Spring, Czesław Mesjasz, John Grin, Pál Dunay, Navnita Chadha Behera, Béchir Chourou, Patricia Kameri-Mbote, P. H. Liotta, 2008-01-23 Put quite simply the twin impacts of globalization and environmental degradation pose new security dangers and concerns In this new work on global security thinking 91 authors from five continents and many disciplines from science and practice assess the worldwide reassessment of the meaning of security triggered by the end of the Cold War and globalization as well as the multifarious impacts of global environmental change in the early 21st century Climate Change, Human Security and Violent Conflict Jürgen Scheffran, Michael Brzoska, Hans Günter Brauch, Peter Michael Link, Janpeter Schilling, 2012-05-26 Severe droughts damaging floods and mass migration Climate change is becoming a focal point for security and conflict research and a challenge for the world's governance structures But how severe are the security risks and conflict potentials of climate change Could global warming trigger a sequence of events leading to economic decline social unrest and political instability What are the causal relationships between resource scarcity and violent conflict This book brings together international experts to explore these questions using in depth case studies from around the world Furthermore the authors discuss strategies institutions and

cooperative approaches to stabilize the climate society interaction Connectors and Dividers Shweta Singh, Marie Nissanka, 2025-10-27 South Asia is characterised by a change in the nature of contemporary armed conflict a shift from interstate to intrastate armed conflict This change is closely enmeshed in post colonial concerns of competing national identities historical memories politics of deprivation and legitimacy It creates challenges for scholars policymakers and practitioners alike who are to develop responses to conflicts in South Asia The liberal state centric emphasis in the fields of political science and international relations often precludes a civil society initiated contextual analysis that focuses on societal tensions Therefore there is a significant lacuna in the literature that can inform policy on a practical level This monograph aims to compensate for this lacuna by providing a comparative analysis of societal Connectors and Dividers C D in Kashmir and Sri Lanka that have the potential to inform policy This empirical work utilises the C D analytical tool within the Do No Harm Framework Anderson 1999 in order to uncover the hidden potential within the tool to aid policy implementation at a national level and to provide pathways for Conflict Transformation in Kashmir and Sri Lanka The C D tool is widely utilised in evaluating humanitarian projects to assess whether any of the actions may result in an unintended negative repercussion while progressing with the project outcomes However at a national policy setting level this tool is unused It is argued that sustainable conflict transformation hinges on imaginative capacities to transcend vicious cycles of violence Published as Volume 61 in the series RCSS Policy Studies Sensemaking for Security Anthony J.

Masys, 2021-05-31 This book presents sensemaking strategies to support security planning and design Threats to security are becoming complex and multifaceted and increasingly challenging traditional notions of security The security landscape is characterized as messes and wicked problems that proliferate in this age of complexity Designing security solutions in the face of interconnectedness volatility and uncertainty we run the risk of providing the right answer to the wrong problem thereby resulting in unintended consequences Sensemaking is the activity that enables us to turn the ongoing complexity of the world into a situation that is comprehended explicitly in words and that serves as a springboard into action Weick Sutcliffe Obstfeld 2005 It is about creating an emerging picture of our world through data collection analysis action and reflection The importance of sensemaking to security is that it enables us to plan design and act when the world as we knew it seems to have shifted Leveraging the relevant theoretical grounding and thought leadership in sensemaking key examples are provided thereby illustrating how sensemaking strategies can support security planning and design This is a critical analytical and leadership requirement in this age of volatility uncertainty complexity and ambiguity that characterizes the security landscape This book is useful for academics graduate students in global security and government and security planning practitioners Human Security in South Asia Adluri Subramanyam Raju, 2019-08-29 This book delves into the theory and praxis of human security in South Asia Home to almost a quarter of the world's population and fast emerging markets South Asia holds social geopolitical and economic significance in the current global context The chapters in the

volume examine the challenges to human security through an exploration of environmental issues including water availability electric waste environmental governance and climate change explore key themes such as development displacement and migration the role of civil society sustainable development and poverty and discuss developmental issues in South Asia and provide a holistic picture of non military security issues Bringing together scholars from varied disciplines this comprehensive volume will be useful for researchers teachers and students of international relations human rights political science development studies human geography and demography defense and strategic studies migration and diaspora studies and South Asian studies

Rethinking Human Security Moufida Goucha,Irakli Khodeli,John Crowley,2008-10-20 This book investigates how revenues derived from natural resource exploitation can be translated into real benefits for the citizens of resource rich countries Shows how despite unprecedentedly high prices of natural resources such as oil and gas on the global market resource rich countries are home to over 60% of the world s poorest people Discusses the counterintuitive phenomenon known as the resource curse and how mineral wealth can impoverish countries Presents the major obstacles for the international community in the fight

Sustainable Development ,2005 This two volume book is the result of concern for translating specialized multi and transdisciplinary research into effective policy measures in the global South Thus researchers academics creative writers thoerists activists and policy makers from different regions of the world have endeavored to highlight critical issues of social and economic development Both volumes highlight the crosscutting linkages between the environment and social sectors and the increasingly complex demands upon the policy arena to respond to these issues quickly and effectively The first volume addresses the broad theme of the environment and its interface with governance and globalization the second volume addresses the issue of sustainable development vis a vis the social sectors
