**Environmental Economics for Watershed Restoration** Hale W. Thurston, Matthew T. Heberling, Alyse Schrecongost, 2009-03-06 Whether addressing pollution problems or helping protect a specific use watershed associations are finding that the competition for funds is getting harder While we can grasp the value of our streams for fishing or kayaking and other services or their cultural value or their value to an ecosystem putting a dollar value on those benefits is not

**The International Handbook on Non-Market Environmental Valuation** Jeff Bennett, 2011-01-01 Non market environmental valuation NMEV is undergoing a period of increased growth in both application and development as a result of increasing recognition of the role of economics in environmental policy issues Against this backdrop The International Handbook on Non Market Environmental Valuation brings together world leaders in the field to advance the development and application of NMEV as a tool for policymaking The expert contributors provide insights into the state of the art across the spectrum of both revealed and stated preference methods and highlight new directions being taken A sequence of topical applications demonstrate various techniques and illustrate what can be achieved using NMEV deliberately diverse case studies are drawn from Europe North America Asia and Australia with valuation targets ranging across use and non use values of the environment A number of reviews of cutting edge issues are also presented This outstanding resource will enable those interested in environmental valuation from theoretical practical or policy perspectives to bring themselves to the forefront of developments and practice As such this Handbook will prove invaluable to a wide ranging audience encompassing academics researchers students practitioners and consultants involved in environmental economics and NMEV

**Economic Analysis for Ecosystem-Based Management** Daniel Holland, James Sanchirico, Robert Johnston, Deepak Jogleka, 2012-06-25 Ocean and coastal management regimes are increasingly subject to competing demands from stakeholders Regulations must not only address fishing recreation and shipping but also sand and gravel mining gas pipelines harbor port development offshore wind and tidal energy facilities liquefied natural gas terminals offshore aquaculture and desalinization plants The growing variety and intensity of ocean and coastal uses increases the call for a more holistic comprehensive and coordinated management approach that recognizes the often complex relationships between natural and human systems For both economist and non economist audiences this book describes ways in which economic analysis can be an important tool to inform and improve ecosystem based management EBM Topics include modeling economic impacts benefit cost analysis spatial considerations in EBM incentives and human behaviors and accounting for uncertainty in policy analysis Throughout the book the authors elucidate the different kinds of insights which can be gained from the use of different economic tools In this rigorous and accessible work the authors defy the conventional stereotype that economic perspectives necessarily favor the greatest commercial development Instead they demonstrate how comprehensive economic analyses consider the full range of potential services offered by marine and coastal ecosystems

including the conservation of biodiversity and creation of recreational opportunities
