Environmental Ethics Joseph R. the challenge of sustainability is that of undermining those traditions that present technology as somehow external to our inherent moral ambiguity This discussion responds to the work of Langdon Winner Albert Borgmann Charles Taylor Martin Heidegger David Abram and others

The River of History Peter Farrugia,2005 The articles in this collection are dedicated to the proposition that human beings make history not just in the sense of being agents of change in the here and now but in the sense that we interpret appropriate and make use of the past for our own purposes in the future Covering topics that range from teaching history to the concept of property rights and the discipline of history in the television age these essays will radically alter the notion of how we make history It will show that we are never fully able to bend history to our will and that as we attempt to do so we are often shocked at the turns it takes despite our best efforts to shape it for future generations
