Enough Staying Human In An Engineered Age:

Enough Bill McKibben, 2004-02 The bestselling author of *The End of Nature* now looks into the not so distant future when genetic science robotics and nanotechnology will push against the very door of humankind's immortality and he challenges readers to confront this most profound question of their existence with care intelligence and ultimately humility **Enough** Bill McKibben, 2003 *Posthuman Personhood* Daryl J. Wennemann, 2013-05-02 *Posthuman Personhood* takes up the ethical challenge posed by Francis Fukuyama's work *Our Posthuman Future* Daryl J Wennemann argues that the traditional concept of personhood may be fruitfully applied to the ethical challenge we face in a posthuman age He draws upon Wilfrid Sellars' treatment of the concept of a person within the manifest image of man in the world Sellars proposed that we develop a stereoscopic view of reality that includes both a scientific understanding of the world and a meaningful place for persons living and acting in the world Following Mary Anne Warren Wennemann develops a distinction between two meanings of the term human a biological meaning and a moral meaning and maintains that all biologically human beings are persons But it is not necessarily the case that all persons must be biologically human After drawing on a contemporary version of Kant's distinction between a theoretical possibility and a real possibility the book posits that biologically non human persons like robots computers or aliens are a theoretical possibility but that we do not know if they are a real possibility Finally Wennemann describes an ethic of self limitation for the posthuman age Battlestar Galactica and Philosophy Jason T. Eberl, 2011-08-31 PHILOSOPHY POP CULTURE The contributors to *Battlestar Galactica and Philosophy* strive to make things relevant to fans of the show and they put their information out in a way that is accessible to folks who wouldn't know Heidegger from Heineken Green Man Review Spring 2009 The writers are well versed in their subjects The book is most effective at making the reader rethink what they thought they knew Neo-opsis What's the point of living after your world has been destroyed This is one of many questions raised by the Sci Fi Channel's critically acclaimed series *Battlestar Galactica* More than just an action packed space opera each episode offers a dramatic character study of the human survivors and their Cylon pursuers as they confront existential moral metaphysical theological and political crises This volume addresses some of the key questions to which the Colonials won't find easy answers even when they reach Earth Are Cylons persons Is Baltar's scientific worldview superior to Six's religious faith Can Starbuck be free if she has a special destiny Is it ethical to cut one's losses and leave people behind Is collaboration with the enemy ever the right move Is humanity a flawed creation Should we share the Cylon goal of transhumanism Is it really a big deal that Starbuck's a woman **Writing with Intent** Margaret Atwood, 2009-04-21 From one of the world's most passionately engaged and acclaimed literary citizens comes *Writing with Intent* the largest collection to date of Margaret Atwood's nonfiction ranging from 1983 to 2005 Composed of autobiographical essays cultural commentary book reviews and introductory pieces to great works of literature this is the award winning author's first book length nonfiction publication in twenty years Arranged chronologically these writings

Theological Foundations in an Age of Biological Intervention David C. Ratke, 2007 In the context of genetics and bioethics the church has a responsibility to engage science and to raise questions of meaning and value related to scientific research This means that the theological resources of the Christian tradition and its Lutheran expression are to be brought to bear in considering the nature of the human in the presence of God and one another This book assembles the papers presented at the 2007 Conference of the Association of Teaching Theologians ELCA ELCIC at Lenoir Rhyne College Hickory North Carolina Presenters were assigned topics in one of the three categories as indicated by the contents listing below

Future Bioethics Ronald Alan Lindsay, 2008 few areas of public policy have been fraught with as much controversy as bioethics Each novel development in biomedical technology seems to spark rancorous disputes Those averse to new technologies often express the concern that the new technology is unnatural or requires us to play God Slogans such as Frankenfoods and sanctity of life substitute for reasoned argument This is an ambitious book that seeks to reframe the debates surrounding current controversies in bioethics Carefully examining and dissecting claims made by many policy makers and ethicists on topics such as assistance in dying genetic engineering and embryonic stem cell research bioethicist Ronald A Lindsay shows that all too often these claims are based on instinctive reactions beliefs that lack factual support and religious or ideological dogma After describing in detail the proper way to approach and resolve a dispute in bioethics Lindsay proceeds to analyse several different cutting edge issues Through his insightful analysis Lindsay demonstrates how to achieve pragmatic progressive solutions to these controversies An antidote for misguided thinking *Future Bioethics* illuminates the way forward to bioethics policies appropriate for the 21st century
