First Contributions To Psycho Analysis Maresfield Library:

First Contributions to Psycho-analysis Sándor Ferenczi, 1994 This book is a collection of Ferenczi's early papers which secured him in an amazingly short time his prominent position among Freud's followers. Included here are several of the papers that now belong to the classics of psychoanalysis such as Introjection and Transference, On Obscene Words, On Onanism, Stages in Development of the Sense of Reality and The Ontogenesis of the Interest in Money. In addition it contains Ferenczi's pioneer papers on impotence, homosexuality, paranoia and symbolism.

FIRST CONTRIBUTIONS TO PSYCHOANALYSIS SANDOR FERENCZI, 2019-06-14

From Obstacle to Ally Judith M. Hughes, 2004-08-02 From Obstacle to Ally explores the evolution of the theory and practice of psychoanalysis through an investigation of historical examples of clinical practice. Beginning with Freud's experience of the problem of transference, this book is shaped around a series of encounters in which psychoanalysts have managed effectively to negotiate such obstacles and on occasion convert them into allies. Judith Hughes succeeds in bringing alive the ideas, clinical struggles and evolving practices of some of the most influential psychoanalysts of the last century including Sándor Ferenczi, Anna Freud, Melanie Klein, Wilfred Bion, Betty Joseph and Heinz Kohut. Through an examination of the specific obstacles posed by particular diagnostic categories, it becomes evident that it is often when treatment fails or encounters problems that major advances in psychoanalytic practice are prompted. As well as providing an excellent introduction to the history of fundamental psychoanalytic concepts, From Obstacle to Ally offers an original approach to the study of the processes that have shaped psychoanalytic practice as we know it today and will fascinate practising psychoanalysts and psychotherapists.

The New Klein-Lacan Dialogues Julia Borossa, Catalina Bronstein, Claire Pajaczowska, 2018-05-01 This book provides a timely exploration and comparison of key concepts in the theories of Melanie Klein and Jacques Lacan, two thinkers and clinicians whose influence over the development of psychoanalysis in the wake of Freud has been profound and far-reaching. Whilst the centrality of the unconscious is a strong conviction shared by both Klein and Lacan, there are also many differences between the two schools of thought and the clinical work that is produced in each.

The purpose of this collection is to take seriously these similarities and differences Deeply relevant to both theoretical reflection and clinical work the New Klein Lacan Dialogues should make interesting reading for psychoanalysts psychotherapists mental health professionals scholars and all those who wish to know more about these two leading figures in the field of psychoanalysis The collection centres around key concepts such as symbolic function the ego the object the body trauma autism affect and history and archives

A Three-Factor Model of Couples Therapy Robert Mendelsohn, 2017-08-07 Couple psychotherapy extends the work of the psychotherapist to the patient s most significant committed adult relationship yet the therapy is difficult both conceptually and technically One major reason for this difficulty is that in every couple s treatment there is a confusing array of psychological defenses as well as regressive and nonregressive couple object relations as distinct from the object relations that each individual member brings to the couple Further many of these processes are occurring outside consciousness and at the very same time This book is an attempt to clarify all the confusing issues by presenting a three factor model of couple psychotherapy within a psychodynamic framework This model has been found to be very effective with many different kinds of couples The book suggests that there are three powerful couple dynamics that shape every couple s treatment A the quality and quantity of the couple s projective identifications B the level of their couple object relations and C the presence or absence of the defense of omnipotent control These three variables are the most important factors in the therapy they determine the success or failure of every therapy with every couple These dynamics also determine quite a bit about how to conduct a couple therapy with regard to the therapist s level of activity tone the way of sorting the material in his or her head and even the kinds of interventions he she chooses whether or not for example the therapist will use certain resistance techniques Understanding these three variables and how they interact is key to the success of the therapy
