**Mine the Gap for Mathematical Understanding, Grades K-2** John SanGiovanni, 2016-10-31 Being an effective math educator is one part based on the quality of the tasks we give one part how we diagnose what we see and one part what we do with what we find Yet with so many students and big concepts to cover it can be hard to slow down enough to look for those moments when students responses tell us what we need to know about next best steps In this remarkable book John SanGiovanni helps us value our young learners misconceptions and incomplete understandings as much as their correct ones because it s the gap in their understanding today that holds the secrets to planning tomorrow s best teaching SanGiovanni lays out 160 high quality tasks aligned to the standards and big ideas of grades K 2 mathematics including counting and representing numbers number relationships and comparison addition and subtraction within 100 and 1000 money and time and multiplication and division The tasks are all downloadable so you can use or modify them for instruction and assessment Each big idea offers a starting task followed by what makes it a high quality task what you might anticipate before students work with the task 4 student examples of the completed task showcasing a distinct gap commentary on what precisely counts for mathematical understanding and the next instructional steps commentary on the misconception or incomplete understanding so you learn why the student veered off course three additional tasks aligned to the mathematics topic and ideas about what students might do with these additional tasks It s time to break our habit of rushing into re teaching for correctness and instead get curious about the space between right and wrong answers **Mine the Gap for Mathematical Understanding** is a book you will return to again and again to get better at selecting tasks that will uncover students reasoning better at discerning the quality and clarity of students understanding and better at planning teaching based on the gaps you see

**MAVA Math** Marla Weiss, 2008-08 Living My Dream is a true to life story The author takes us step by step through the events of his life from childhood in a tiny village of Greece to retirement in the USA and beyond Occasionally throughout the book and in his epilogue he allows us to take a peek at his personal philosophy regarding God truth justice science and our universe in general Here he introduces unconventional yet convincing ideas to support his philosophy Most noticeable however is his candid and clear recounting of the events of poverty and hardship throughout his youth At times the story becomes almost incredible and we cannot help wonder whether or not those conditions existed indeed in the 1940s and 1950s when he grew up and attended high school or at the time he worked and attend college at the same time As a child and as a teenager he lived through two civil wars and during the German occupation of the land that left him with lasting memories related to

those dreadful events He witnessed the worst form of human brutality perpetuated by men against their fellow men and he was the onlooker of death and destruction of property at the time he was trying to receive his elemental and high school education He was not able or was not allowed to quench his thirst for higher education in Greece and against all odds he migrated to the USA to satisfy the desire for his college education Without financial support and ignorant of the English language he arrived in Chicago in 1959 and fought to finance his schooling and to receive his BA He has been a member of the Food Technology Institute recognized by Who s Who in America and in addition to being chemist he became Packaging Engineer by attending the packaging school of Michigan State University Living My Dream is truly a compelling story narrating the life story of a young man who struggles to survive and to receive his education under unfavorable social climate His life story is intertwined with his dream to accomplish things in life regardless of the obstacles that presented themselves along the way and is the incarnation of what he believes Everything is possible if you have the desire provided your expectations from yourself are real he says To say the least his narrative makes us appreciate all the freedoms and opportunities our democratic system offers to all of us things we are taking for granted **ICSE NumbersWiz Class 8**
