Stokman, 1994 This pathbreaking book illuminates the politics of issue resolution within the European Community with evaluations and comparisons of competing models of decision making across twenty two policy issues Written by American and Dutch scholars the book will be of great interest to students of comparative politics public policy analysts mathematic modelers and all those concerned with the development of the European Community One set of models explored in this volume the expected utility model treats politics as a conflictual activity while the other the exchange or log rolling model emphasizes the cooperative nature of political processes The alternative approaches model decision making in fundamentally different ways and make very different predictions about how issues in the European Community will be resolved To facilitate direct comparison of their predictive and explanatory value the models in this volume are based on the same variables the potential control of actors over outcomes the salience of the issues for the actors and the outcomes preferred by the actors The contributors test their models in the context of sixteen issues already resolved by the Council of Ministers and six issues currently under consideration providing the reader with considerable knowledge about the controversies surrounding European Community policy on such topics as automobile emissions nuclear radiation norms air transport liberalization and the European banking system They conclude that the conflictual model and the cooperative model are less competitive and more complementary than has been thought and they explain in detail how the models can be fruitfully combined *France and the European Union* Emiliano Grossman, 2020-11-25 The character of international trade has changed dramatically over the past twenty years Previously published as a special issue of The Journal of European Public Policy this volume provides a state of the art study of the new trade politics Preferences and Procedures Torsten J. Selck, 2006-07-02 Preferences and Procedures presents and tests game theoretic models of European Union legislative decision making It is inspired by the idea of linking statistical testing strategies firmly to formal models of EU policymaking After describing salient features of the EU legislative process and comparing different models of how the EU negotiates new legislative measures the models predictive power is evaluated On a more general level Preferences and Procedures answers questions regarding the empirically recognizable effects of institutional arrangements on joint bargaining outcomes **The SAGE Handbook of European Union Politics** Knud Erik

Jørgensen, Mark Pollack, Ben Rosamond, 2007-01-03 This volume is one to which anyone trying to make sense of the EU of the early 21st century will return again and again A terrific line up that combines diverse talents from North America and Europe Few books of this kind could live up to the billing definitive benchmark but this one certainly does John Peterson University of Edinburgh A most useful book that can be highly recommended A strong analytical framework coupled with unparalleled coverage of the major issues of the political science research of the EU makes this volume a formidable tool for teaching and a significant input to new scholarly research It is both relatively sophisticated and very accessible to graduate students and advanced researchers The clear writing style and the richness of information presented will certainly make this book interesting for non academic readers Igor Vidacak Institute for International Relations Zagreb Journal of Common Market Studies An admirably comprehensive source book for those interested in how the tools of political science inspire EU area studies The editors enlist leading researchers to synthesize the state of the art in their field of expertise The Handbook of European Union Politics will be an indispensable intellectual resource for researchers teachers and graduate students of the European Union Liesbet Hooghe University of North Carolina at Chapel Hill USA Presents an excellent overview of political science research on the EU It finds the right balance between establishing the state of the art and pointing the reader to theoretical diversity Highly recommended for advanced students and scholars looking for quick and solid orientation in a fragmented field and for new ideas for research Frank Schimmelfennig ETH Zurich Switzerland This is a milestone in the study of EU politics The authors include the most knowledgeable practitioners in the field and collectively they provide a comprehensive and highly competent overview of the state of theory and research on EU institutions politics and policies Fritz Scharpf Max Planck Institute for the Study of Societies Germany The European Union EU poses quite profound questions for scholars and students of the social and political sciences This benchmark handbook is designed to provide an authoritative state of the art guide to the scope of the field suitable for both established scholars and students of the EU reflect and contribute to the debates about the nature of the field of EU studies and EU politics in particular explore in detail the development of the many approaches to the study of EU politics Divided into four sections the Handbook focuses on theorizing European integration the EU as polity politics and policy making in the EU and the EU and the international system Its appeal will reside not only in its comprehensive and authoritative coverage of the field but also in the quality of its contributors and the diversity of theoretical and methodological approaches included The resulting volume is a must have for all scholars and advanced students of the EU and European integration *The Common Fisheries Policy in the European Union* Eugénia da Condeição-Heldt, 2004-03 The purpose of this book is neither to duplicate overviews of the Common Fisheries Policy CFP nor to recapitulate narrative treatments of the European integration process The aim is to comprehend how EU negotiations work theoretically and empirically so that a conceptual framework for analyzing EU international negotiations will be provided and juxtaposed to two key negotiations leading to the establishment of the CFP Air

Between Chaos and Sclerosis Dietrich Drüner, 2008 This study examines the stability of legislative decisions in the European Union before and after enlargement and after the possible entry into force of the Lisbon Treaty Stability of decisions is analysed both in terms of a risk of decision cycles and in terms of the frequency of gridlock situations The risk of such chaotic decisions depends on three parameters the applied decision rules the dimensionality of the conflict space and the heterogeneity of actor preferences Dietrich Drüner uses the concepts of the core and the winset which stem from spatial voting and veto players theory and which incorporate the three parameters Testing these concepts against a data set about 70 legislative proposals Dietrich Drüner generates empirical findings about the impacts of enlargement and institutional reform on the EU's decision making processes This book is intended for scholars of European integration and politics as well as policy makers at both the European and the national level *Journal of Economic Literature* ,1995 European Access
