Morell, 2013-10-22 Program Evaluation in Social Research presents a plan for developing evaluation into a form of applied social research that is not only methodologically sound but also relevant to the problems of society and built on a technological as opposed to a scientific model This book views evaluation as applied relevant social research and as social technology and assesses its validity and usefulness This monograph is comprised of eight chapters and begins with an assessment of the consequences of program evaluation for the conduct of social research and for society at large and how evaluation can be made into a method of generating practical and powerful suggestions for planning successful social programs The concept of outcome evaluation is also organized into meaningful categories which can be used for the intelligent planning of appropriate evaluation activities The reader is then introduced to the types of evaluation that are carried out the relative merits of each type and how to optimize the validity and utility of each type Evaluation as a technological rather than a scientific pursuit is also discussed The remaining chapters focus on the frictions that arise during the implementation of program evaluation program evaluation as a profession and how evaluation can be developed into a relevant and powerful method of guiding the course of social innovations. educational and social programs have experienced major cultural and political shifts in service delivery philosophy including a focus on quality mainstreaming deinsti tutionalization community inclusion and an emphasis on measurable outcomes Recently stakeholders of these programs have demanded more than just the provision of service forcing program administrators to evalu ate their programs effectiveness and efficiency The era of accoun tability is here and my major goal in writing this book is to help current and future program administrators understand that they need to look beyond simply the provision of service Indeed they need to be competent in outcome based evaluation which I define as a type of program evaluation that uses valued and objective person referenced outcomes to analyze a program s effectiveness impact or benefit cost By design this book can be read from the perspective of a consumer or producer of outcome based evaluation As a consumer the reader will be introduced to the various techniques used in outcome based evaluation and how to interpret data from outcome based evaluation analyses As a producer the reader will be instructed in how to do outcome based evalu ation analyses along with how to use and act on their results For both the consumer and producer two questions should guide the use of outcome based evaluation Planning for Creative Change in Mental Health Services: Use of **program evaluation** National Institute of Mental Health (U.S.),1972 **InterStudy Information and Referral Center** Study: pt.1 Information & referral services, research findings, pt.2 Appendix 1, pt.3 Appendix 2 Nicholas James **Program Evaluation in the Public Sector** Gail A.
