Tilton, Juan Ignacio Guzmán, 2016-03-17 This textbook provides an introduction to the field of mineral economics and its use in understanding the behaviour of mineral commodity markets and in assessing both public and corporate policies in this important economic sector The focus is on metal and non metallic commodities rather than oil coal and other energy commodities The work draws on John Tilton s teaching experience over the last 30 years at the Colorado School of Mines and the Catholic University of Chile as well as short courses for RioTinto and other mining companies This is combined with the professional consulting and academic research of Juan Ignacio Guzmán over the past decade in order to demonstrate the

Auty, Raymond F. Mikesell, 1998 The mineral economies comprise approximately one fifth of developing countries They face special problems in achieving sustainable development and have as a group been less successful than resource deficient neighbours This book examines the apparent paradox detailing the current problems facing the mineral economies and the future policies necessary to overcome these problems Nine countries are studied Botswana Chile Colombia Indonesia Jamaica Namibia Papua New Guinea Peru and Trinidad and Tobago The authors argue that the key factor is not the sustainability of the mineral production that initially generates growth but the maintenance of the economic and social conditions for sustaining that growth They draw upon recent progress in environmental and natural resource accounting to show how this can be achieved and also assess the socio political factors that often constrain sustainable development     **Mineral Consumption and Economic Development in the United States and the Soviet Union** Gregory Grossman, 1952     **Mineral Consumption and Economic Development in the United States and the Soviet Union**, by Gregory Grossman and D.
