Free Creation Software:

Free Software, the Internet, and Global Communities of Resistance Sara Schoonmaker, 2018-01-19 This book explores software's pivotal role as the code that powers computers, mobile devices, the Internet, and social media. Creating conditions for the ongoing development and use of software, including the Internet as a communications infrastructure, is one of the most compelling issues of our time. Free software is based upon open source code developed in peer communities as well as corporate settings, challenging the dominance of proprietary software firms and promoting the digital commons. Drawing upon key cases and interviews with free software proponents based in Europe, Brazil, and the U.S., the book explores pathways toward creating the digital commons and examines contemporary political struggles over free software, privacy, and civil liberties on the Internet that are vital for the commons' continued development.

Towards Engineering Free/Libre Open Source Software (FLOSS) Ecosystems for Impact and Sustainability Brian Fitzgerald, Audris Mockus, Minghui Zhou, 2019-07-05 Free/libre/open source software (FLOSS) ecosystems such as Linux have had a tremendous impact on computing and society and have captured the attention of businesses, researchers, and policy makers. Research on FLOSS has been ongoing for almost two decades. From an economic perspective, the most common topics involve motivation and organization. As commercial participation in FLOSS has become common, the question of how to combine FLOSS practice with commercial practice has been the subject of research, particularly with a view to understanding how to ensure sustainability of the ecosystem. This book is based on a Shonan meeting on FLOSS ecosystem sustainability held in June 2017. The meeting brought together a blend of established and young researchers who were actively studying the FLOSS phenomenon. These researchers were drawn from a variety of disciplines, including software engineering, human-computer interaction, information systems, computer-supported cooperative work, data mining, cognitive science, psychology, operations research, and management. Industry practitioners who were active in the FLOSS space also participated. This book presents the results of discussion on fundamental questions related to the impact and sustainability of FLOSS ecosystems, including: How does an ecosystem form? How do different stakeholders work together to form a community that develops and maintains valuable and freely available software, and how does an ecosystem with millions of repositories and developers operate given the lack of centralized planning? How does an ecosystem evolve in response to the environment as technology and needs evolve over time? How do newcomers learn the protocols and practices of an ecosystem? How would they sustain the ecosystem? What is the relationship between people and ecosystem sustainability?

AUUGN, 2003-03 *Emerging Free and Open Source Software Practices* Sowe, Sulayman K., Stamelos, Ioannis G., Samoladas, Ioannis, 2007-06-30 This book is a collection of empirical research regarding the status of FLOSS projects, presenting a framework and state-of-the-art references on FLOSS projects, reporting on case studies covering a wide range of FLOSS applications and domains.
