Critical Disability Studies and the Disabled Child Harriet Cooper,2020-03-20 This book examines the relationship between contemporary cultural representations of disabled children on the one hand and disability as a personal experience of internalised oppression on the other In focalising this debate through an exploration of the politically and emotionally charged figure of the disabled child Harriet Cooper raises

questions both about what it means to speak for the other and about what resistance means when one is unknowingly invested in one's own abjection. Drawing on both the author's personal experience of growing up with a physical impairment and on a range of critical theories and cultural objects from Frances Hodgson Burnett's novel *The Secret Garden* to Judith Butler's work on injurious speech, the book theorises the making of disabled and rehabilitated subjectivities. With a conceptual framework informed by both psychoanalysis and critical disability studies, it investigates the ways in which cultural anxieties about disability come to be embodied and lived by the disabled child. Posing new questions for disability studies and for identity politics about the relationships between lived experiences, cultural representations and dominant discourses, and demonstrating a new approach to the concept of internalised oppression, this book will be of interest to scholars and students of disability studies, medical humanities, sociology and psychosocial studies, as well as to those with an interest in identity politics more generally.

A Historical Sociology of Disability Bill Hughes, 2019-09-26. Covering the period from Antiquity to Early Modernity, *A Historical Sociology of Disability* argues that disabled people have been treated in Western society as good to mistreat and with the rise of Christianity, good to be good to. It examines the place and role of disabled people in the moral economy of the successive cultures that have constituted Western civilisation. This book is the story of disability as it is imagined and reimagined through the cultural lens of ableism. It is a story of invalidation of the material habituations of culture and moral sentiment that paint pictures of disability as what not to be. The author examines the forces of moral regulation that fall violently in behind the dehumanising ontological fait accompli of disability invalidation and explores the ways in which the normative community conceived of, narrated and acted in relation to disability. *A Historical Sociology of Disability* will be of interest to all scholars, students and activists working in the field of Disability Studies, as well as sociology, education.
