repeat viewing practices Feeling Film does this through a critique of purely textual approaches instead offering a model which emphasises lived warm embodied and inhabited psychological relationships between the viewer and the viewed It extends the narrative action of cinema beyond the duration of the screening into realms of anticipation and afterlife in particular providing insight into the tertiary and participatory practices afforded through rich media engagement In rethinking the everyday co productive relationship between viewer and viewed from this perspective Feeling Film reinstates the importance of feelings as a central concern for film theory What emerges from this study is a re engagement of the place of emotion affect and feeling in film theory and criticism In reconsidering the duration of the cinematic encounter Feeling Film makes a significant contribution to the understanding of the inter subjective relationship between viewer and viewed It takes post Jungian criticism into the realms of post cinema technologies and reignites the dialogue between depth psychology and the study of images as they appear to and for us This book will make essential reading for those interested in the relationship between film and aspects of depth psychology film and philosophy students at advanced undergraduate and postgraduate levels film and cinema academics and cinephiles *Laws of Inheritance* Elizabeth Brodersen,2015-08-14 Instilled in interdisciplinary cross cultural perspectives of mythical socio economic literary pedagogic and psychoanalytic representations two archetypal creative inheritance laws interact as twins Eros fusion containment safety and Thanatos division separation risk Hypothesising these twin laws as matrilineal Eros and patrilineal Thanatos this book explores why cross cultural forms including gender traits are not fixed but are instead influenced by earlier flexible matrilineal forms Through a study of twins on macro and micro levels Elizabeth Brodersen argues that a psychological twin dilemma is implicit in inheritance laws and offers a unique forum to show how each law competes for primacy as the first and other Chapters begin by looking at twins in creation myths and the historical background to the laws of inheritance as well as literary representations The book then moves on to the developmental structures imbued in twin research and educational systems to explore how past cultural forms have been re defined to fit a modern landscape and the subsequent movement away from the importance of patrilineal primogeniture Laws of Inheritance will be of key value to academics researchers and postgraduate students in the fields of psychoanalysis psychotherapy archetypal theory cross cultural depth psychology cultural anthropology sociology gender studies and twin research The book will also be of interest to practicing psychoanalysts and psychotherapists *The Death of Web 2.0* Greg Singh,2018-12-07 With all our contemporary connectivity are we really connected What does the nature of connectivity tell us about interpersonal and community relationships What ethical concerns are raised through an always on culture Communication in today s world is characterised by a condition of persistent semi permanent connectivity which seems to bring us closer together but which can also be profoundly alienating The Death of Web 2 0 takes a retrospective look at a moment in recent media history that has had and will continue to have a lasting impact upon the predominant attitude towards cultures of connectivity Greg Singh draws from a range of approaches

intellectual traditions and scholarly disciplines to engage key questions underpinning the contemporary communications media ecosystem Bringing together influences from communitarian ethics recognition theory and relational and depth psychology Singh synthesises key approaches to produce a critical inquiry that projects the tensions at the heart of connectivity as a principle of Web 2 0 He argues that Web 2 0 is a cultural moment that is truly over and that what is popularly described as Web 2 0 is an altogether different set of principles and practices The Death of Web 2 0 recognises the consequences of our always on culture where judgments are made quickly and where impacts can be far reaching affecting our relationships wellbeing mental health and the health of our communities and it concludes by asking what an ethics of connectivity would look like This unique interdisciplinary work will be essential reading for academics and students of Jungian and post Jungian studies media and cultural studies and psychosocial studies as well as anyone interested in the social implications of new media
