Discovering the Merit of the Wavelet Transform for Object Classification Matthew D. Eyster, Air Force Institute of Technology (U.S.), 2004-03 Vision is the primary sense by which most biological systems collect information about their environment Computer vision is a branch of artificial intelligence concerned with endowing machines with the ability to understand images Object recognition is a key part of machine vision with far reaching benefits ranging from target recognition surveillance systems to automation systems Extraction of salient features from an image is one of the key steps in object recognition Typically geometric primitives are extracted from an image using local analysis However the wavelet transform provides a global approach with good locality Additionally the directional and multiresolution properties may be exploited as a pre processor to a neural network This thesis examines the benefits of the wavelet transform as a preprocessor to a neural network for object recognition Scaling of the wavelet coefficients and different neural network topologies are investigated The system developed in this research is not intended to be critiqued on its classification performance It only successfully classifies about 20% of the photographed models however more important is the determination of the benefits of the wavelet transform the effects of the various post wavelet scaling functions and the best neural network topology for this research This is done by analyzing the system's performance on CAD models Proceedings of International Conference on

Extraction and Recognition in Smart Sensor Environments Marcin Woźniak, 2021-09-01 Recent years have seen a vast development in various methodologies for object detection and feature extraction and recognition both in theory and in practice When processing images videos or other types of multimedia one needs efficient solutions to perform fast and reliable processing Computational intelligence is used for medical screening where the detection of disease symptoms is

carried out in prevention monitoring to detect suspicious behavior in agriculture systems to help with growing plants and animal breeding in transportation systems for the control of incoming and outgoing transportation for unmanned vehicles to detect obstacles and avoid collisions in optics and materials for the detection of surface damage etc In many cases we use developed techniques which help us to recognize some special features In the context of this innovative research on computational intelligence the Special Issue Advanced Computational Intelligence for Object Detection Feature Extraction and Recognition in Smart Sensor Environments present an excellent opportunity for the dissemination of recent results and achievements for further innovations and development It is my pleasure to present this collection of excellent contributions to the research community Prof Marcin Wo niak Silesian University of Technology Poland

Multimedia Data Mining and Knowledge Discovery Valery A. Petrushin, Latifur Khan, 2007-10-20 This tightly edited collection of papers from leading researchers worldwide provides an overview of the current state of the art in the field of multimedia data mining and knowledge discovery and discusses the variety of hot topics in multimedia data mining research Consisting of an introductory section and four topical parts the book describes the objectives and current tendencies in multimedia data mining research and their applications Each part contains an overview of its chapters and leads the reader with a structured approach through the diverse subjects in the field Written with graduates in mind this much needed comprehensive reflection of the current state of multimedia data mining and knowledge discovery will also be a valuable resource for researchers in the field This book provides an overview of the current state of the art in the field of multimedia data mining and knowledge discovery and discusses the variety of hot topics in multimedia data mining research Topics and Features Features a comprehensive introduction to multimedia data mining and its relevance today presents a global perspective of the field and its various components provides broad yet thorough and detailed coverage of the subject numerous chapters reference websites with supplementary materials and demonstrations explores multimedia data exploration multimedia data modeling and evaluation and visualization offers an entire part devoted to applications and case studies Written with graduate students in mind this much needed comprehensive survey of the current state of multimedia data mining and knowledge discovery will also serve as a valuable resource for researchers with interests in multimedia data mining summarization indexing and retrieval

Advances in Machine Learning and Data Mining for Astronomy Michael J. Way, Jeffrey D. Scargle, Kamal M. Ali, Ashok N. Srivastava, 2012-03-29 Advances in Machine Learning and Data Mining for Astronomy documents numerous successful collaborations among computer scientists statisticians and astronomers who illustrate the application of state of the art machine learning and data mining techniques in astronomy Due to the massive amount and complexity of data in most scientific disciplines the material discussed in this text transcends traditional boundaries between various areas in the sciences and computer science The book s introductory part provides context to issues in the astronomical sciences that are also important to health social and physical sciences particularly probabilistic and statistical aspects of classification and

cluster analysis The next part describes a number of astrophysics case studies that leverage a range of machine learning and data mining technologies In the last part developers of algorithms and practitioners of machine learning and data mining show how these tools and techniques are used in astronomical applications With contributions from leading astronomers and computer scientists this book is a practical guide to many of the most important developments in machine learning data mining and statistics It explores how these advances can solve current and future problems in astronomy and looks at how they could lead to the creation of entirely new algorithms within the data mining community *Handbook of Research on Emerging Perspectives in Intelligent Pattern Recognition, Analysis, and Image Processing* Kamila, Narendra Kumar, 2015-11-30 Dissertation Abstracts International ,2009 Automatic Object Recognition ,1996 Roadside Video Data Analysis Brijesh Verma, Ligang Zhang, David Stockwell, 2017-04-28 This book highlights the methods and applications for roadside video data analysis with a particular focus on the use of deep learning to solve roadside video data segmentation and classification problems It describes system architectures and methodologies that are specifically built upon learning concepts for roadside video data processing and offers a detailed analysis of the segmentation feature extraction and classification processes Lastly it demonstrates the applications of roadside video data analysis including scene labelling roadside vegetation classification and vegetation biomass estimation in fire risk assessment **Data Mining and Knowledge Discovery** ,2001 Computational Intelligence and Modelling Techniques for Disease Detection in Mammogram Images D. Jude Hemanth, 2023-11-16 Computational Intelligence and Modelling Techniques for Disease Detection in Mammogram Images comprehensively examines the wide range of AI based mammogram analysis methods for medical applications Beginning with an introductory overview of mammogram data analysis the book covers the current technologies such as ultrasound molecular breast imaging MBI magnetic resonance MR and Positron Emission mammography PEM as well as the recent advancements in 3D breast tomosynthesis and 4D mammogram Deep learning models are presented in each chapter to show how they can assist in the efficient processing of breast images The book also discusses hybrid intelligence approaches for early stage detection and the use of machine learning classifiers for cancer detection staging and density assessment in order to develop a proper treatment plan This book will not only aid computer scientists and medical practitioners in developing a real time AI based mammogram analysis system but also addresses the issues and challenges with the current processing methods which are not conducive for real time applications Presents novel ideas for AI based mammogram data analysis Discusses the roles deep learning and machine learning techniques play in efficient processing of mammogram images and in the accurate defining of different types of breast cancer Features dozens of real world case studies from contributors across the globe **Proceedings of the ... Feature Fusion for Next-Generation AI Anindya Nag,Md. Mehedi

Hassan,Anupam Kumar Bairagi,2025-10-10 This book delves into the fundamental concepts methodologies and practical implementations of feature fusion providing valuable perspectives on how merging several data aspects might augment the decision making skills of artificial intelligence Feature fusion is inherently connected to the advancement of intelligent solutions from medical data as it enables the incorporation of various and complementary data sources to construct more advanced AI models Within the medical domain data manifests in diverse formats including electronic health records EHRs medical imaging genomic data and real time sensor metrics Although each of these data kinds offers distinct perspectives they may have limitations in terms of their breadth or depth when considered independently The application of feature fusion enables the integration of diverse data sources into a unified model hence improving the AI s capacity to detect patterns make precise predictions and produce significant insights The fusion process facilitates the development of intelligent solutions that exhibit enhanced reliability and effectiveness by using a more extensive reservoir of knowledge For example an artificial intelligence system that combines imaging data with clinical history might enhance the precision of disease diagnosis forecast patient outcomes and suggest tailored treatment strategies Feature fusion is the crucial factor in unleashing the complete capabilities of medical data enabling artificial intelligence to provide intelligent solutions that not only enhance the provision of healthcare but also stimulate advancements in medical research and practice The proposed book explores the advanced notion of feature fusion within the field of artificial intelligence with a particular emphasis on its implementation in physiological data The integration of many data sources is crucial in the development of more precise dependable and understandable AI models as the healthcare industry becomes more data driven
