Howard Carter T. G. H. James, 2001-04-12 In November 1922 a momentous discovery unlike any other before or since was to change our understanding of the ancient world Until now however the marvellous story of Carter's quest for Tutankhamun and its culmination in his unearthing of the intact treasure filled tomb has been told without a reliable account of the man behind the discovery and the myths that have surrounded it Howard Carter's career was a remarkable one he had arrived in Egypt 30 years earlier as a 17 year old tracer with rudimentary education and progressed to become the first Chief Inspector of Antiquities in Upper Egypt An improbable but auspicious partnership with the 5th Earl of Carnarvon developed in which the young Carter acted as assistant and learned man to the aristocrat's

excavations in the Theban necropolis But it was the legendary discovery in the Valley of the Kings and Carter's painstaking clearance of the intact royal burial that was to secure his place in history He became an international celebrity simultaneously honoured and vilified wherever he went but he was also a sad disillusioned man whose success never brought any reward of happiness T G H James definitive biography is both the story of perhaps the most renowned archaeologist of all time and of an essentially tragic human being Scanning the Pharaohs Zahi A. Hawass, Sahar Saleem, 2016 The royal mummies in the Cairo Museum are an important source of information about the lives of the ancient Egyptians The remains of these pharaohs and queens can inform us about their age at death and medical conditions from which they may have suffered as well as the mummification process and objects placed within the wrappings Using the latest technology including Multi Detector Computed Tomography and DNA analysis the authors present the results of the examination of the royal mummies New imaging techniques not only reveal a wealth of information about each mummy but render amazingly lifelike and detailed images of the remains

The Tomb of Tutankhamun Vol. I Howard Carter, 2014-11-20. Let me try and tell the story of it all. It will not be easy for the dramatic suddenness of the initial discovery left me in a dazed condition and the months that have followed have been so crowded with incident that I have hardly had time to think. Among the hundreds of books written about ancient Egypt and Tutankhamen you won't find an equal to Howard Carter's powerful book about his discovery. His great work in many ways remained unfinished. He left us however this remarkable document of discovery. The book is Carter's personal story of the greatest adventure of his life, one that has not been surpassed in nearly a century of archaeology. In 1904 retired American lawyer Theodore Davis famously declared that The Valley of the Kings in Thebes had given up all of its secrets, leaving nothing more to be discovered. He relinquished his exclusive rights to dig in The Valley. But as Howard Carter states in this volume, The history of The Valley has never lacked the dramatic element. Some 18 years later Carter made the richest archaeological discovery in history within yards of where Davis had dug. The world immediately became obsessed with everything Tutankhamen. From architecture to household goods to fashion, a early 20th century surge in fascination with ancient Egypt took hold across the globe. Howard Carter too had been obsessed with finding Tut. The discovery would consume the rest of Carter's life. After becoming known to the world, Howard Carter died in relative obscurity in 1939. This is not a dry scientific treatment of the excavation or the artifacts. What he imparts with this book is a sense of excitement.

The Discovery of Tutankhamun's Tomb Omar Khalil, The search for Tutankhamun s tomb was one of the most ambitious archaeological pursuits of the early 20th century For years Egyptologists and explorers had scoured the Valley of the Kings believing that the burial site of the young pharaoh remained hidden beneath the desert sands Despite previous excavations yielding little success one man remained convinced that the tomb had yet to be discovered Howard Carter a British archaeologist had spent decades working in Egypt developing an unmatched expertise in excavation His belief in the existence of Tutankhamun s tomb was fueled by fragments of artifacts bearing the young pharaoh s name suggesting that his final resting place was still untouched However funding such an extensive search required a patron and it was Lord Carnarvon a wealthy British aristocrat who provided the financial backing In 1917 Carter s systematic excavation of the Valley of the Kings began but after several years of fruitless digging Carnarvon grew impatient By 1922 with resources nearly depleted Carter convinced Carnarvon to allow him one final season of excavation It was in November of that year that Carter s persistence paid off While investigating an area near the tomb of Ramses VI workers uncovered a set of steps leading down into the earth Clearing away the debris Carter discovered a sealed doorway marked with the insignia of Tutankhamun Excitement and caution filled the air as he realized that the tomb had remained undisturbed for centuries
