Introduction to High Performance Computing for Scientists and Engineers Georg Hager, 2010-07-02 Written by high performance computing HPC experts Introduction to High Performance Computing for Scientists and Engineers provides a solid introduction to current mainstream computer architecture dominant parallel programming models and useful optimization strategies for scientific HPC From working in a scientific computing center the author **High Performance Computing in Science and Engineering, Garching/Munich 2009** Siegfried Wagner, Matthias Steinmetz, Arndt Bode, Markus Michael Müller, 2010-08-12 The Leibniz Supercomputing Centre LRZ and the Bavarian Competence Network for Technical and Scientific High Performance Computing KONWIHR publish in the present book results of numerical simulations facilitated by the High Performance Computer System in Bavaria HLRB II within the last two years The papers were presented at the Fourth Joint HLRB and KONWIHR Review and Status Workshop in Garching on 8th and 9th December 2009 and were selected from all progress reports of projects that use the HLRB II Similar to the workshop two years ago the majority of the contributed papers belong to the area of computational fluid dynamics CFD condensed matter physics astrophysics chemistry computer sciences and high energy physics We note a considerable increase of the user community in some areas Compared to 2007 the number of papers increased from 6 to 12 in condensed matter physics and from 2 to 5 in high energy physics Biosciences contributed only one paper in 2007 but four papers in 2009 This indicates that the area of application of supercomputers is continuously growing and entering new fields of research The year 2007 saw two major events of particular importance for the LRZ First after a substantial upgrade with dual core processors the SGI Altix 4700 supercomputer reached a peak performance of more than 62 Tera ops And second the national organization Gauss Centre for Supercomputing e.V. GCS was founded on April 13th **Evolving the High Performance Computing and Communications Initiative to Support the Nation's Information Infrastructure** National Research Council, Computer Science and Telecommunications Board, Committee to Study High Performance Computing and Communications: Status of a Major Initiative, 1995-03-27 Maintaining the United States strong lead in information technology will require continued federal support of research in this area most of which is currently funded under the High Performance Computing and Communications Initiative HPCCI The Initiative has already accomplished a great deal and should be continued This book provides 13 major recommendations for refining both HPCCI and support of information technology research in general It also provides a good overview of the development of HPCC technologies **Tools for High Performance Computing 2015** Andreas Knüpfer, Tobias Hilbrich, Christoph Niethammer, José Gracia, Wolfgang E. Nagel, Michael M. Resch, 2016-07-27 High Performance Computing HPC remains a driver that offers huge potentials and benefits for science and society However a profound understanding of the computational matters and specialized software is needed to arrive at effective and efficient simulations Dedicated software tools are important parts of the HPC software landscape and support application developers

Even though a tool is by definition not a part of an application but rather a supplemental piece of software it can make a fundamental difference during the development of an application. Such tools aid application developers in the context of debugging, performance analysis and code optimization and therefore make a major contribution to the development of robust and efficient parallel software. This book introduces a selection of the tools presented and discussed at the 9th International Parallel Tools Workshop held in Dresden, Germany, September 2-3, 2015, which offered an established forum for discussing the latest advances in parallel tools.

Software Engineering for Science Jeffrey C. Carver, Neil P. Chue Hong, George K. Thiruvathukal, 2016-11-03. *Software Engineering for Science* provides an in-depth collection of peer-reviewed chapters that describe experiences with applying software engineering practices to the development of scientific software. It provides a better understanding of how software engineering is and should be practiced and which software engineering practices are effective for scientific software. The book starts with a detailed overview of the Scientific Software Lifecycle and a general overview of the scientific software development process. It highlights key issues commonly arising during scientific software development as well as solutions to these problems. The second part of the book provides examples of the use of testing in scientific software development, including key issues and challenges. The chapters then describe solutions and case studies aimed at applying testing to scientific software development efforts. The final part of the book provides examples of applying software engineering techniques to scientific software, including not only computational modeling but also software for data management and analysis. The authors describe their experiences and lessons learned from developing complex scientific software in different domains.

About the Editors: Jeffrey Carver is an Associate Professor in the Department of Computer Science at the University of Alabama. He is one of the primary organizers of the workshop series on Software Engineering for Science (<http://www.SE4Science.org/workshops>). Neil P. Chue Hong is Director of the Software Sustainability Institute at the University of Edinburgh. His research interests include barriers and incentives in research software ecosystems and the role of software as a research object. George K. Thiruvathukal is Professor of Computer Science at Loyola University Chicago and Visiting Faculty at Argonne National Laboratory. His current research is focused on software metrics in open source mathematical and scientific software.
