Fate And Utopia In German Sociology Studies In Contemporary German Social Thought:

Fate and Utopia in German Sociology, 1870-1923 Harry Liebersohn, 1990-08-15 *Fate and Utopia in German Sociology* provides a lucid introduction to a major sociological tradition in Western thought. It is an intellectual history of five scholars: Ferdinand Tönnies, Ernst Troeltsch, Max Weber, Georg Simmel, and Georg Lukács, who created modern German sociology over the course of fifty years from 1870 to 1923. Liebersohn portrays his subjects as thinkers who were deeply immersed in the politics and poetry of their time and whose sociology benefited in unexpected ways from sources as diverse as medieval mysticism and Nietzsche's *Birth of Tragedy*. He maps out their shared sociological discourse shaped in response to the fragmentation they perceived in public life in education and the arts and in Protestant religious life. German sociology has generally been interpreted as having a tragic perspective on modern society as implied by the pervasive idiom of fate. Liebersohn argues that this sense of fate was matched by an underlying utopian hope for an end to fragmentation rooted for all of his subjects in the Lutheran idea of community. The book's five biographical chapters are structured to discuss ideas of community, society, and personality in the work of the individual discussed, while there is a general movement among the chapters from community to society to socialism. Many specific texts are discussed, and the overall orientation is one of intellectual history rather than sociological analysis.

Civil Society and Political Theory Jean L. Cohen, Andrew Arato, 1994-03-29 In this first serious work on the theory of civil society to appear in many years, Jean Cohen and Andrew Arato contend that the concept of civil society articulates a contested terrain in the West that could become the primary locus for the expansion of democracy and rights. In this major contribution to contemporary political theory, Jean Cohen and Andrew Arato argue that the concept of civil society articulates a contested terrain in the West that could become a primary locus for the expansion of democracy and rights.

The Semblance of Subjectivity Tom Huhn, Lambert Zuidervaat, 1997 The essays are organized around the twin themes of semblance and subjectivity. Whereas the concept of semblance or illusion points to Adorno's links with Marx, Nietzsche, and Freud, the concept of subjectivity recalls his lifelong struggle with a philosophy of consciousness stemming from Kant, Hegel, and Lukács.

The Moral Self Gil G. Noam, Thomas E. Wren, 1993 This follow-up to *The Moral Domain* carries forward the exploration of new ways of modeling moral behavior. This follow-up to *The Moral Domain* carries forward the exploration of new ways of modeling moral behavior. Whereas the first volume emphasized the work of Lawrence Kohlberg and the tradition of cognitive development, *The Moral Self* presents a paradigm that also incorporates noncognitive structures of selfhood. The concerns of the sixteen essays include the diversity of moral outlooks, the dynamics of creating a moral self, cognitive and noncognitive prerequisites of the psychological development of autonomy and moral competence, and motivation and moral personality.
