Cambridge Business English Dictionary Roz Combley,2011-11-10 The most up to date business English dictionary created specially for learners of English **Power Wagon Reference Book** Stanley A. Phillips,1920 **Emerging Technologies to Promote and Evaluate Physical Activity** Dan J Graham,James Aaron Hipp,Simon Marshall,Jacqueline Kerr,2014-10-23 Increasingly efforts to promote and measure physical activity are achieving greater precision greater ease of use and or greater scope by incorporating emerging technologies This is significant for physical activity promotion because more precise measurement will allow investigators to better understand where when and how physical activity is and is not occurring thus enabling more effective targeting of particular behavior settings Emerging technologies associated with the measurement and evaluation of physical activity are noteworthy because 1 Their ease of use and transferability can greatly increase external validity of measures and findings 2 Technologies can significantly increase the ability to analyze patterns 3 They can improve the ongoing systematic collection and analysis of public health surveillance due to real time capabilities associated with many emerging technologies 4 There is a need for research and papers about the cyberinfrastructure required to cope with big data multiple streams processing aggregation visualization etc and 5 Increasingly blurred boundaries between measurement and intervention activity e g the quantified self self tracking movement may necessitate a reevaluation of the conventional scientific model for designing and evaluating these sorts of studies There have been many recent disparate advances related to this topic Advances such as crowdsourcing allow for input from large diverse audiences that can help to identify and improve infrastructure for activity e g large group identification of environmental features that are conducive or inhibiting to physical activity on a national and even global scale Technologies such as Global Positioning Systems GPS and accelerometry are now available in many mobile phones and can be used for identifying and promoting activity and also understanding naturalistically occurring activity SenseCam and other personal visual devices and mobile apps provide person point of view context to physical activity lifestyle and timing

Further multiple sensor systems are enabling better identification of types of activities like stair climbing and jumping that could not previously be identified readily using objective measures like pedometers or accelerometers in isolation The ability of activity sensors to send data to remote servers allows for the incorporation of online technology e g employing an online social network as a source of inspiration or accountability to achieve physical activity goals and websites such as Stickk com enable individuals to make public contracts visible to other users and also incorporates financial incentives and disincentives in order to promote behaviors including physical activity In addition the increasing use of active gaming e g Wii XBox Kinect in homes schools and other venues further underscores the growing link between technology and physical activity

Improvements in mathematical models and computer algorithms also allow greater capacity for classifying and evaluating physical activity improving consistency across research studies Emerging technologies in the promotion and evaluation of physical activity is a significant area of interest because of its ability to greatly increase the amount and quality of global recorded measurements of PA patterns and its potential to more effectively promote PA Emerging technologies related to physical activity build on our own and others interdisciplinary collaborations in employing technology to address public health challenges This research area is innovative in that it uses emerging resources including social media crowdsourcing and online gaming to better understand patterns of physical activity

The Secret War Between the Wars Kevin Quinlan, 2014 The methods developed by British intelligence in the early twentieth century continue to resonate today Much like now the intelligence activity of the British in the pre Second World War era focused on immediate threats posed by subversive clandestine networks against a backdrop of shifting great power politics Even though the First World War had ended the battle against Britain's enemies continued unabated during the period of the 1920s and 1930s Buffeted by political interference and often fighting for their very survival Britain's intelligence services turned to fight a new clandestine war against rising powers Soviet Russia and Nazi Germany Using recently declassified files of the British Security Service MI5 *The Secret War Between the Wars* details the operations and tradecraft of British intelligence to thwart Communist revolutionaries Soviet agents and Nazi sympathizers during the interwar period This new study charts the development of British intelligence methods and policies in the early twentieth century and illuminates the fraught path of intelligence leading to the Second World War An analysis of Britain's most riveting interwar espionage cases tells the story of Britain's transition between peace and war The methods developed by British intelligence in the early twentieth century continue to resonate today Much like now the intelligence activity of the British in the pre Second World War era focused on immediate threats posed by subversive clandestine networks against a backdrop of shifting great power politics As Western countries continue to face the challenge of terrorism and in an era of geopolitical change heralded by the rise of China and the resurgence of Russia a return to the past may provide context for a better understanding of the future Kevin Quinlan received his PhD in History from the University of Cambridge He works in Washington DC
