Double Edge (Fault Lines) Thomas Locke, 2015-06-02 Leave behind your perceptions of what is possible and race into the unknown corridors of human consciousness in this breakneck prequel to Thomas Locke's *Trial Run* *The Idea of History in Constructing Economics* Michael H. Turk, 2015-08-11 How scientific is economics This question has often been framed by analogies and correspondences made between economics and other seemingly more well established scientific disciplines starting with classical mechanics At the same time economics is likely to be seen in opposition to or in contrast with history where the reliance upon generalizing rules thought experiments and model construction in economics is set against the amassing of particular facts intended to create narratives in history In this new volume Turk explores the relationship between economics and history including the often fraught one between economics and economic history making the case that economics does in fact require the proper grounding in history that has so often been ignored This work challenges the attempt to link economics with other more clearly scientific disciplines as flawed and fundamentally wrongheaded A key element of this book is its examination of the gaps and associations that exist in or are seen through linkages with thermodynamics classical mechanics biology literature mathematics philosophy and sociology This exploration is frequently undertaken through study of the work of one or more major figures in the history of economic thought ranging from Quesnay and Smith through Walras and Max Weber to Robinson Krugman David and Arthur Through the possibility of an alternative to the gaps noted in each such comparison the underlying necessary connection between economics and history can be brought out The book concludes by exploring the basis for the positive construction of a historical economics This book is suited for those who study history of economic thought and philosophy of economics Creative Writing For Adults Maya Linden, 2025-10-31 Do you second guess your ideas stall in the messy middle or struggle to finish your stories Are you looking for a simple step by step way to build solid plots and unforgettable characters without academic jargon Do you want practical tools that turn blank pages into chapters readers can't put down If you answered YES to at least one of these questions you MUST KEEP READING Unlock the Secrets to Writing Page Turning Fiction With Confidence Many adult writers start strong then hit a wall plots that sag scenes that wander characters who feel flat and revisions that never seem to end The sheer volume of tips templates and must do rules can be overwhelming and it's no surprise so many promising ideas get abandoned in a folder labeled someday But don't despair you're not alone in this journey Presenting *Creative Writing For Adults Crafting Compelling Stories With Practical Methods For Building Plots And Memorable Characters* This book distills proven storytelling techniques into a clear repeatable system you can use right away Instead of theory overload you'll get practical methods checklists and bite size exercises that guide you from idea to outline to polished draft You'll learn how to shape a protagonist with clear goals raise meaningful stakes design scenes that escalate tension and weave subplots that deepen the emotional payoff You'll also discover simple ways to sharpen dialogue choose the right point of view and revise with purpose

[Becoming a White Antiracist](#) Stephen D. Brookfield, Mary E. Hess, 2023-07-03 As this book was being

written the United States exploded in outrage against the murder by police of people of color across the country Corporations branches of state and local government and educational institutions all pledged to work for racial justice and the Black Lives Matters movement moved into the mainstream as people from multiple racial and class identities pledged their support to its message Diversity initiatives abounded mission statements everywhere were changed to incorporate references to racial justice and the rampant anti blackness endemic to US culture was brought strikingly to the surface Everywhere it seemed white people were looking to learn about race What do we do How can we help These were the cries the authors heard most frequently from those whites whose consciousness of racism was being raised This book is their answer to those cries It s grounded in the idea that white people need to start with themselves with understanding that they have a white racial identity Once you ve learned about what it means to be white in a white supremacist world the answer of what can I do becomes clear Sometimes you work in multiracial alliances but more often you work with white colleagues and friends In this book the authors explore what it means for whites to move from becoming aware of the extent of their unwitting collusion in racism towards developing a committed antiracist white identity They create a road map or series of paths that people can consider traveling as they work to develop a positive white identity centered around enacting antiracism The book will be useful to anyone trying to create conversations around race teach about white supremacy arrange staff and development workshops on racism and help colleagues explore how to create an antiracist culture or environment This work happens in schools colleges and universities and we suspect many readers will be located in K 12 and higher education But helping people develop an antiracist identity is a project that occurs in corporations congregations community groups health care state and local government arts organizations and the military as well Essentially if you have an interest in helping the whites you interact with become antiracist then this book is written very specifically for you Watch our BWAR YouTube playlist where authors Stephen Brookfield and Mary Hess chat about some common themes from the book
