Problems of Evolution Frederick Webb Headley,1900 Atlantic Communities María Teresa Caneda-Cabrera,Rui Carvalho Homem,David Johnston,2022-12-26 Historically the Atlantic Ocean has served to define the relationship between the so called worlds of the Old and the New A geographical divide between continents it is also no less a historical space across which peoples have travelled sharing ideas and cultural practices a site of encounter and exchange that has shaped the lives of communities and nations across the globe This book maps this productive web of multi layered connections not just in terms of military migratory economic and commercial actions and processes but also of shifting lines of translation that have mobilised ideas fomented the exchange of experiences and opened up channels of communication The Atlantic is considered here a global translation zone that has been created through a myriad of crossings physical and conceptual and historically shaped through the reciprocal influences between the different communities situated around and beyond its

shores In the final analysis the book explores the Atlantic as a zone of created relation characterised by the interaction between processes of translation mobility and in the best of cases of hospitality and most importantly as a space no longer defined by economic and military power but by the multiplicity of identities forged in its ambit This book will be of interest to scholars and advanced students of translation studies literature history human geography politics sociology and cultural studies It was originally published as a special issue of the journal *Atlantic Studies* *Kaplan SAT II Biology 2002-2003*

Implausible Beliefs Allan Mazur, 2017-07-05 Why do people accept ideas that are contradicted by science or logic In *Implausible Beliefs* Allan Mazur offers a comparative look at the nature of irrational belief systems their social roots and their

cultural and political impact He begins by providing standards for judging beliefs implausible and assessing the impact of such belief systems on politics and social policy in the US Mazur describes and defends commonsense criteria for establishing that certain views should not be sustained in the face of present day understanding He presents a statistical portrait of implausible beliefs rampant in the US and who tends to accept them Mazur applies criteria for implausibility to the Bible astrology and visitation to Earth of intelligent beings from other worlds Pointing out that everyone knows the Bible but few actually read it the author scrolls through the first five books of the text noting points that undermine the scripture's natural history and moral guidance Working on the assumption that implausible religious views are fundamentally no different from implausible secular views he critiques secular beliefs in astrology and UFOs Mazur concludes the volume with an attempt to explain why most people accept implausibility some more than others despite evidence and logic that refute them Looking to mainstream sociology and psychology Mazur shows how children are socialized into such beliefs and how adults are influenced by spouses and friends Personality is also a factor sometimes abetted by stressful or lonely life situations Lucidly written this is a provocative and informative contribution to social psychology sociology religion political science and American studies
