Objections to Evolution Nirushan

Sivanesan, 2023-05-11 The theory of evolution as proposed by Charles Darwin in 1859 has been plagued by controversy and criticisms since its inception But in the Western world at least the fight seems to be almost over with evolution being seen by many as a sealed deal The theory has made its way into science textbooks and has firmly lodged itself there Could this be the biggest mistake the scientific community has ever made Objections to Evolution addresses this question It reexamines the evidence for evolution and brings forth a new case against it from a nonreligious perspective This case contains completely unique and thought provoking ideas arguments and theories It asks and answers fundamental questions which have not been addressed previously and attempts to create a revolution in the way we think about our origins

Implausible Beliefs

Allan Mazur, 2017-07-05 Why do people accept ideas that are contradicted by science or logic In Implausible Beliefs Allan

Mazur offers a comparative look at the nature of irrational belief systems their social roots and their cultural and political

impact He begins by providing standards for judging beliefs implausible and assessing the impact of such belief systems

on politics and social policy in the US Mazur describes and defends commonsense criteria for establishing that certain views

should not be sustained in the face of present day understanding He presents a statistical portrait of implausible beliefs

rampant in the US and who tends to accept them Mazur applies criteria for implausibility to the Bible astrology and visitation

to Earth of intelligent beings from other worlds Pointing out that everyone knows the Bible but few actually read it the author scrolls through the first five books of the text noting points that undermine the scripture s natural history and moral guidance Working on the assumption that implausible religious views are fundamentally no different from implausible secular views he critiques secular beliefs in astrology and UFOs Mazur concludes the volume with an attempt to explain why most people accept implausibility some more than others despite evidence and logic that refute them Looking to mainstream sociology and psychology Mazur shows how children are socialized into such beliefs and how adults are influenced by spouses and friends Personality is also a factor sometimes abetted by stressful or lonely life situations Lucidly written this is a provocative and informative contribution to social psychology sociology religion political science and American studies
