Frhe Holzkirchen Im Nrdlichen Europa:

Wood and Wood Joints Klaus Zwerger, 2023-05-22 There is a long tradition of using wood as a distinct and ecologically sound building material. Wooden architecture conveys for today's world the breadth of knowledge held in Western and Eastern cultures about the creative use of this unique material. The typical technique of building with wood joinery requires that elements are connected only by the skillful interlocking of the constructive parts. In this book, the history of wooden architecture is described in detail using hundreds of examples from Japan, China, and Europe. From a holistic understanding, a picture emerges that is informative for architects and designers, reopens an almost lost world to builders, and will enthral laypeople. Also available in a German edition. ISBN 978 3 0356 2479 3

Structural Analysis of Historic Construction: Preserving Safety and Significance, Two Volume Set Dina D'Ayala, Enrico Fodde, 2008-06-02 The successful preservation of an historic building complex or city depends on the continued use and daily care that come with it. The possibility of continued use depends on the adaptation of the building to modern standards and practice of living, requiring changes in constructional or structural features. Conservation engineering is the process.

Early Medieval Munster Michael A. Monk, John Sheehan, 1998 A major contribution to the study and understanding of Early Medieval Ireland, which offers radical interpretations of new evidence.

The North-Eastern Frontiers of Medieval Europe Alan V. Murray, 2017-05-15 By the mid twelfth century, the lands on the eastern coast of the Baltic Sea, from Finland to the frontiers of Poland, were Catholic Europe's final frontier: a vast undeveloped expanse of lowlands, forest, and waters inhabited by peoples belonging to the Finnic and Baltic language groups. In the course of the following three centuries, Finland, Estonia, Livonia, and Prussia were incorporated into the Latin world through processes of conquest, Christianisation, and settlement, and brought under the rule of Western monarchies and ecclesiastical institutions. Lithuania was left as the last pagan polity in Europe, yet able to accept Christianity on its own terms in 1386. The Western conquest of the Baltic lands advanced the frontier of Latin Christendom to that of the Russian Orthodox world and had profound and long-lasting effects on the institutions, society, and culture of the region, lasting into modern times. This volume presents 21 key studies, 2 of them translated from German for the first time, on this crucial period in the development of North Eastern Europe, dealing with crusade and conversion, the establishment of Western rule, settlement, and society, and the development of towns, trade, and the economy. It includes a classified bibliography of the main works published in Western languages since World War II, together with an introduction by the editor.

The Grove Encyclopedia of Medieval Art and Architecture Colum Hourihane, 2012 This volume offers unparalleled coverage of all aspects of art and architecture from medieval Western Europe, from the 6th century to the early 16th century. Drawing upon the expansive scholarship in the celebrated Grove Dictionary of Art and adding hundreds of new entries, it offers students, researchers, and the general public a reliable, up-to-date, and convenient resource covering this field of major importance in the development of Western history and international art and architecture.
