From Abraham To America A History Of Jewish Circumcision

Arthur James Wells

From Abraham To America A History Of Jewish Circumcision:

From Abraham to America Eric Silverman, 2006-07-27 Silverman's new book is a comprehensive overview of Jewish circumcision throughout history. Beginning with Genesis the author traces paradoxes and tensions in biblical Jewish circumcision as seen both within Judaism and from the dominant non-Jewish culture. Topics include rabbinic literature, early Christianity, Medieval notions of menstruating Jewish men and the blood libel, the relic of Christ's foreskin, modern notions of the Jewish body and Jewish manhood and the current debate over Jewish and routine medical circumcision in America.

Men and Masculinities in Christianity and Judaism Björn Krondorfer, 2009 A comprehensive collection of texts that maps out the field of Critical Men's Studies in Religion. It contains 35 key texts that engage with the position of men in society and church, the ideals of masculinity as engendered by religious discourse and alternative trajectories of being in the world, whether spiritually, relationally or sexually. *Judaism, Christianity, and Islam* Sander L. Gilman, 2014-11-01 Islam, Christianity and Judaism share several common features including their historical origins in the prophet Abraham, their belief in a single divine being and their modern global expanse. Yet it is the seeming closeness of these Abrahamic religions that draws attention to the real or imagined differences between them. This volume examines Abrahamic cultures as minority groups in societies which may be majority Muslim, Christian or Jewish or self-consciously secular. The focus is on the relationships between these religious identities in global Diaspora where all of them are confronted with claims about national and individual difference. The case studies range from colonial Hong Kong and Victorian London to today's San Francisco and rural India. Each study shows how complex such relationships can be and how important it is to situate them in the cultural, ethnic and historical context of their world. The chapters explore ritual practice, conversion, colonization, immigration and cultural representations of the differences between the Abrahamic religions. An important theme is how the complex patterns of interaction among these religions embrace collaboration as well as conflict even in the modern Middle East. This work by authors from several academic disciplines on a topic of crucial importance will be of interest to scholars of history, theology, sociology and cultural studies as well as to the general reader interested in how minority groups have interacted and coexisted. This is a groundbreaking collection of original, learned and cutting-edge essays on various aspects of the three major monotheistic religions in modern times. The subjects of the essays range across the globe from Hong Kong and South Asia to Victorian Britain and Weimar Germany and teach us to see each tradition and all three traditions together in new and original ways. A distinctive contribution. Steven T. Katz, Boston University. *Judaism, Christianity and Islam* is remarkable for bringing together accessible scholarly essays, each with keen insight, exploring the diverse Abrahamic cultures and their complex interactions. As the human landscape of Europe continues to evolve, this superb series of engagements with the past and present is an indispensable guide. Michael Berkowitz, University College London. Gilman remains an unparalleled expert at identifying cutting-edge interdisciplinary research. The essays in this superb volume provide urgently needed

comparative and theoretical examinations of the constructed natures of Christianity Islam and Judaism and the complex and challenging relationships they engender Lisa Silverman University of Wisconsin Milwaukee Illness and Image Sander L. Gilman,2018-01-16 The humanities in higher education are too often labeled as impractical and are not usually valued in today s marketplace Yet in professional fields such as the health sciences interest in what the humanities can offer has increased Advocates claim the humanities offer health care professionals greater insight into how to work with those who need their help Illness and Image introduces undergraduates and professionals to the medical humanities using a series of case studies beginning with debates about male circumcision from the ancient world to the present to the meanings of authenticity in the face transplantation arena The case studies address the interpretation of mental illness as a disability and the new category of mental illness self harm Sander L Gilman shows how medicine projects such categories existence into the historical past to show that they are not bound in time and space and therefore are real Illness and Image provides students and researchers with models and possible questions regarding categories often assumed to be either trans historical or objective making it useful as a textbook Judaism Eliezer Segal,2009 *Diseases and Diagnoses* Sander L. Gilman,2017-09-08 *Diseases and Diagnoses* discusses why such social problems as addiction sexually transmitted diseases racial predisposition for illness surgery and beauty and electrotherapy all of which concerned thinkers a hundred years ago are reappearing at a staggering rate and in diverse national contexts In the twentieth century such problems were viewed as only historical concerns Yet in the twenty first century we once again find ourselves confronting their implications In this fascinating volume Gilman looks at historical and contemporary debates about the stigma associated with biologically transmitted diseases He shows that there is no indisputable way to measure when a disease or therapy will reappear or how it may be perceived at any given moment in time Consequently Gilman focuses on the socio cultural and political implications that the reappearance of such diseases has had on contemporary society His approach is to show how culture embedded in cultural objects both feeds and is fed by the claims of medical science as for example the reappearance of race as a cultural as well as a medical category If the twentieth century was the age of physics in the latter part of the past century and certainly in the twenty first century biological concerns are recapturing central stage Achievements of the biological sciences are changing the public s sense of what constitutes cutting edge science and medicine None has captured the public imagination more effectively than the mapping of the human genome and the promise of genetic manipulation which fuel what Gilman calls a second age of biology Although not without controversy the role of genetics appears to be key Gilman puts contemporary debates in historical context showing how they feed social and cultural concerns as well as medical possibilities **Marked in Your Flesh** Leonard B. Glick,2005-06-30 From the author of Abraham s Heirs comes a history of Jewish and Christian beliefs about circumcision from its ancient origins to modern day The Oxford Encyclopedia of the Modern World Peter N. Stearns,2008 This multivolume encyclopedia includes articles on countries regions and ethnic groups

themes involving social history demography family life politics economics religion thought education science and technology and culture and events such as major wars **Brother Keepers** Harry Brod, Shawn Israel Zevit, 2010 **Brother Keepers** New Perspectives on Jewish Masculinity is an international collection of new essays on Jewish men by academics and activists rabbis and secularists men and women on personal experience and congregational life gendered bodies and Jewish minds poetry and prayer literature and film and more Simultaneously particular and universal all engagingly illuminate how masculinities and Judaisms engage each other in gendered Jewishness **The Children's Folklore Review** , 2009

Introducing Judaism Eliezer Segal, 2009 First Published in 2009 Routledge is an imprint of Taylor Francis an informa company The New Yorker , 2006 Delivered from the Elements of the World Peter J. Leithart, 2016-03-30 In this wide ranging study bursting with insights Peter Leithart explores how and why Jesus death and resurrection address the deepest realities of this world This biblical and theological examination of atonement and justification challenges conventional perceptions and probes the depths of the death that changes everything **Encyclopaedia of the Presbyterian Church in the United States of America** Alfred Nevin, 1884 The Jewish Encyclopedia Isidore Singer, 1901 *The Jewish Encyclopedia: Chazars-Dreyfus Case* Isidore Singer, 1903 **The British National Bibliography** Arthur James Wells, 2006 **Golden Thoughts on Chastity and Procreation** John William Gibson, Mrs. John William Gibson, 1904 **The Jewish Encyclopedia: Apocrypha-Benash** Isidore Singer, 1902 The Jewish Encyclopedia , 1912
