From Flux to Frame Maarten Van Acker, 2015-01-26 Bridging the gap between urban planning and transport history this book investigates the spatial impact of highways motorways canals tramways and railways on the surrounding landscape

The Art of Urbanization Tom Broes, 2025-12-10 The Art of Urbanization reexamines a forgotten tradition in Belgian and European planning history reconstructed through a longitudinal analysis of the Study Committee of the Antwerp Agglomeration 1907 1939 Against prevailing trends Antwerp's urban expansion was not the product of rational master planning but evolved gradually through collective and pragmatic responses to emerging urban questions Drawing on a wide range of historical sources and richly illustrated the book reconstructs how numerous sub plans each addressing economic sociocultural political and ecological needs coalesced into the incremental components of a reasoned and dynamic urban agglomeration As it engages with classical concepts in urban theory and global urban history The Art of Urbanization is presented as a generative redistributive reproductive and situated worlding practice offering a fresh perspective on urbanism that resonates in our current age of planetary urbanization *Questioning Proximity - Opportunities and*

Challenges for Urban Planning and Mobility Policies Paola Pucci, Giovanni Vecchio, 2024-08-28 The book discusses some of the issues related to proximity challenges an acritical use of the concept and highlights several dimensions that may better frame the actual contribution of proximity to urban and mobility planning in different places The contributions address the conditions required for ensuring accessibility by proximity and the different planning dimensions that can support its promotion addressing issues related to the inclusiveness of this model as well as the scalability and metrics of proximity we need to deal with in several different contexts The first part of the book introduces some experimental approaches aimed at operationalising accessibility by proximity while the second part discusses several planning issues related to the implementation of proximity at different scales *Stadsgeschiedenis 2017 - 2*, 2017-12-06 Koenraad Danneels Bruno

 Development in Belgium* Ashok K. Dutt,F.J. Costa,2013-03-09 Belgium is a small country but its planning traditions are rooted
 in a heritage which has been greatly enriched by its central location in the West European community of nations Medieval
 Renaissance and industrial age planning and urban design gave Belgium many examples of architectural masterpieces
 especially in the city centers During the post World War II period Belgian planners and politicians legislated national
 planning laws that divided the country into 48 planning regions also called sub regions and sectors and empowered the
 municipalities communes with potent legal instruments to direct land development in accordance with their plans
 Preparation amendment and execution of these plans in a democratic society with a strong laissezJaire tradition have been
 painstaking but nonethe less significant tangible results have been achieved The purpose of this book is to explore and assess
 the successes and failure of Belgian planning and make this record available in English so that they may remain facets of
 Belgian planning The general socio economic and historical background is provided with a view to understanding the
 theoretical legal physical and selected topical aspects of Belgian planning In doing so a multi disciplinary approach has been
 taken and the authors have been selected from a variety of disciplines Professor Louis Albrechts of the University of Leuven
 is a planning theorist Ms Brigitte Beernaert and Mr Karel Vroom are practicing planners Beernaert is also a planning
 historian Legal and administrative backgrounds are represented by the planning experts Dr Urban Development in
 Western Europe Erwin Anton Gutkind,1971 Infrastructural Optimism Linda C. Samuels,2021-09-30 Infrastructural
 Optimism investigates a new kind of twenty first century infrastructure one that encourages a broader understanding of the
 interdependence of resources and agencies recognizes a rightfully accelerated need for equitable access and distribution and
 prioritizes rising environmental diligence across the design disciplines Bringing together urban history case studies and
 speculative design propositions the book explores and defines infrastructure as the basis for a new form of urbanism
 emerging from the intersection of architecture landscape architecture and urban design In defining this new infrastructure
 the book introduces new dynamic and holistic performance metrics focused on measuring what matters over growth for the
 sake of growth and twelve criteria that define next generation infrastructure By shifting the focus of infrastructure our
 largest public realm to environmental symbiosis and quality of life for all design becomes a catalytic component in creating a
 more beautiful productive and optimistic future with Infrastructural Urbanism as its driver Infrastructural Optimism will be
 invaluable to design non profit and agency professionals and students in the fields of architecture landscape architecture and
 urban design working in partnership with engineers hydrologists ecologists urban planners community members and others

who shape the built environment through the expanded field of infrastructure
