From Inner Sources New Directions In Object Relations Psychotherapy:

From Inner Sources N. Gregory Hamilton, 1992 Clinical theory is becoming a way of understanding oneself and one's patients rather than a tool for determining the best technical intervention as a thing in itself. This change has brought increased recognition that different therapists need different theories with their patients and that even the same clinician may need different theories at different times. As a result, there is a new tolerance for and even an encompassing of divergent viewpoints. Today is an age of multiple models in psychotherapy. *From Inner Sources: New Directions in Object Relations Psychotherapy* includes chapters by the most prominent contributors to this change: Kernberg, Adler, Ogden, McDougall, Pine, and the Scharffs. These clinicians, among others, originally laid the base for object relations theories in the United States. Their ideas about how individuals grow and change by internalizing and externalizing experience were derived from psychoanalytic investigations into severe mental disorders. As these concepts have been more widely understood and accepted, they have been applied to a wider range of disorders and problems. Each chapter reflects in a different way how object relations psychotherapies are moving in new directions while maintaining their connection with the original inner source. The central concepts such as empathy, containment, object identification, splitting, countertransference, and the examination of internal object relations are emphasized in each of the contributions. The chapters are clinically relevant and contain significant case material. Although it is not an introduction to object relations theory, this book is understandable to beginning therapists while containing sufficient depth and controversial discussion for advanced clinicians. The focus of this book is on individual psychotherapy with emphasis on examination of the therapist's intersubjective experience in relation to the patient as opposed to focusing on the patient's experience alone. Object Relations Couple Therapy David E. Scharff, Jill Savege Scharff, 2000-04-01 In this landmark book, David Scharff and Jill Savege Scharff, both psychoanalysts, develop a way of thinking about and working with the couple as a small group of two held together as a tightly knit system by a commitment that is powerfully reinforced by the bond of mutual sexual pleasure. **Love and Hate in the Analytic Setting** Glen O. Gabbard, 2000-04-01 Passionate feelings of love and hate are stirred in psychotherapy. Paradoxically, these passions may either undermine the therapist catastrophically or serve as the crucible in which profound understanding is forged. Transferences and countertransferences of love and hate occur on a spectrum that includes unobjectionable negative and positive feelings, relatively benign forms of love and hate, and more malignant, intractable versions of love and hate that present formidable challenges to the therapist. Each of these variations is explored in different chapters of this book. Gender configurations, gender fluidity, adolescent transferences, the link between love and lust, and passive forms of hating are among the topics discussed. Most of all, the author, noted psychoanalyst Glen Gabbard, depicts what it is like to be in the eye of the hurricane when passions are aroused. He provides a practical yet theoretically sophisticated guide to the management of love and hate as they are experienced by both patient and therapist. Intricate

Engagements Steven A. Frankel, 2004 In this fine book Dr Steven A Frankel paints the portraits of his collaborating patients vividly graphically and with consummate compassion Treatment for Frankel is never a discussion and surely not one filled with the therapist s abstinence it is a vital interactive and changing experience for both partners He is no less skillful in engaging and educating the reader His review of psychoanalytic theories and research is in itself a prodigious and productive education It is tempting to suggest that this important contribution to psychoanalysis and psychoanalytic therapy is one illustration of theory finally catching up to sensitive and effective practice Frankel closes his lovely book with thanks to the reader for coming on this part of my journey Shirley Cooper LCSW

Cruelty, Violence, and Murder Arthur Hyatt-Williams, 1998 Convicted murderers their death sentences commuted to life in prison when England abolished the death penalty are some of the subjects of this psychological study of what makes people kill Psychiatrist Arthur Hyatt Williams worked for many years in long term psychotherapy with these murderers and others who tried to kill or were troubled by thoughts of killing The result an investigation into the depths of the criminal mind and the line that separates those who kill from those who only think about killing or those who only injure themselves

Close Encounters Robert Winer, 1994 The traditional view of the therapeutic interaction fails to capture the heart of the process when it pictures the therapist as disinterested and distanced agent of change Growing interest in the helpful use of countertransference reflects a shift toward a two person view of treatment There has been surprisingly little effort however to explore systematically the full potential of such a model for making sense of the therapeutic process Emphasis on the relational aspect of treatment has too often been derisively equated with the idea that cure occurs through a sophisticated form of parental caring with the role of interpretation being essentially incidental The fear of being discredited in this way has kept therapists from trying to conceptualize the ways in which a two person process in fact underlies the patient s and therapist s search for meaning Contrasts a One person and a Two person Analysis of an Initial Interview In Close Encounters Dr Robert Winer takes on this quest He begins by dramatizing the differences through contrasting a one person and a two person analysis of an initial interview Having demonstrated the problem he then reviews the ways in which both American and British authors have introduced relational considerations and shows how the intrapsychic and interpersonal views of man complement each other Throughout the book Dr Winer illustrates his reasoning with clinical accounts in which he offers a frank and vivid description of his own participation Marriage Can be Usefully Taken as a Metaphor for Therapy Dr Winer explores the two person view from a variety of vantage points He suggests that the implicit model of therapy as a parent child endeavor can be usefully revised by taking marriage as the metaphor From another perspective he suggests that the contemporary interest in narratives makes more sense when the storytelling is conceptualized as a two person endeavor Freud s account of his treatment of the Wolf Man is offered as a cautionary tale to illustrkes on this quest He begins by dramatizing the differences through contrasting a one person and a two person analysis of an initial interview Having demonstrated the problem he then

The Self and the Ego in Psychotherapy Gregory N. Hamilton,1996-07 An introduction to a different approach to object relations therapy specifically it integrates ego functioning as an element of object relationships Clinical examples explain the utility of this integration with references to assessment brief therapy supportive therapy and more *Object Relations Therapy of Physical and Sexual Trauma* Jill Savege Scharff,David E. Scharff,1994 Rising above the polemics surrounding sexual and physical abuse David and Jill Savege Scharff bring a relational perspective to the integration of psychoanalytic and trauma theories in order to understand the effects of overwhelming physical or psychological trauma including sexual abuse injury and birth defect The Scharffs draw from their object relations therapy with individuals families and couples recovering from trauma an abundance of relevant clinical examples described in their characteristically personal and vivid style Their treatment approach influenced by Fairbairn Klein and Winnicott is respectful of the patient s experience They advise avoiding premature interpretations that impose their own reality on patients because this traumatizes them just as their abuser did In order to work well with these traumatized people the clinician must be able to tolerate ambiguity and sustain longterm therapy for it takes the patience of waiting and wondering to recover deeply repressed memories explore them thoroughly and evaluate their meaning and importance for the patient The Scharffs demonstration of clinical processes helps therapists contain their own countertransference to trauma so as to be fully present with their clients and consistently able to confront abuse patterns in society The object relations approach not only deals with trauma s impact on the individual but views it in its cultural and interpersonal context as well Society alternately emphasizes and ignores trauma so that an encapsulated traumatic experience festers until the next eruption just as dissociative defenses segmentally protect and exaggerate traumatic experience in the individual case The Scharffs review Kramer s Mahlerian approach McDougall s insights into the silence of the psyche and the words of the soma and Anzieu s elaboration of the body ego They resuscitate Freud s seduction hypothesis and the traumatic basis of the repetition compulsion They compare and contrast the concepts of repression and dissociation Moving from there to develop an object relations perspective they draw on Winnicott s concepts of the psychosomatic partnership the environmental and object mothers and the potential space Klein s contributions of the infusion of aggression and death anxiety into developmentally critical relationships Fairbairn s view of the endopsychic situation with reference to his early unpublished papers on childhood sexual abuse that presage his later theory building and

Personal Relations Therapy Harry Guntrip, 1994 This book gives us the broad sweep of a remarkable psychoanalytic writer Harry Guntrip whose place is at the forefront of our efforts to explain the role of an emergent and resilient self in the organization and maintenance of human relations I believe that a substantial part of Guntrip's discovery his work on a painful and bleak frontier that was simultaneously within himself and in the realm of the science of psychoanalysis has been

absorbed into the sensibility of the field with far less attribution and direct appreciation than is warranted Harry Guntrip brought a unique intensity to the examination of personal experience in constructing and validating psychoanalytic meaning His heritage draws directly on the tradition of Freud whose personal struggles formed the raw data for *The Interpretation of Dreams* There are few works of such stature in the annals of our work few examples of the blending of life and art life and science Guntrip's work is one of them In this volume Jeremy Hazell has done far more than simply collect the records He has done that and he has allowed it to stand for itself But he has done so through his own lens through a depth of understanding and valuing that shines through His introduction is a record of the interweaving of Guntrip's personal growth with his psychoanalytic understanding It is a Baedeker of Guntrip's travels a rich appreciation a tribute and a fine work in its own right Guntrip's work is important to us perhaps now more than ever The issues with which he grappled have come to haunt us in a time of ever more consciousness of the toll of social and personal deprivation and of a growing awareness that our work is not concerned with egos with the mechanisms of an autonomous mind as much as it is with selves in relation to others Taking from his teachers and colleagues from Fairbairn Winnicott and Sutherland Guntrip worked tirelessly to teach that it is in the depth of personal relations that we find ourselves and that dedication to this process offers us what we have to give to our patients Jeremy Hazell has drawn together the record of this personal journey He has understood it absorbed its meaning and given it to us that we may use it and expand its reach I am grateful to him for his dedication and for the appearance of this collection at long last a work that will illuminate paths of new exploration in psychoanalysis for many years to come

Treating Borderline States in Marriage Charles C. McCormack, 2000 McCormack has constructed a new therapeutic approach to work with the acting out primitive defenses and undifferentiated dyadic relationships characteristic of personality disordered couples Creating a holding environment is just one of the techniques offered in this unique book that will enhance the capacities of every therapist On Freud's Couch Irène Matthis, Imre Szecsödy, 1998 These new interpretations reflect new perspectives conferred by the passage of time and the continuing transformations in social truth

From Instinct to Self William Ronald Dodds Fairbairn, 1994 To find more information on Roman Littlefield titles please visit www.romanlittlefield.com The Autonomous Self John Derg Sutherland, 1994-03 A collection of the brilliant papers of John D Sutherland this volume gives the reader a unique education in the development of the self Noted psychoanalyst theoretician and editor J D Sutherland was best known as editor of the *International Psychoanalytic Library* and as the Director of the Tavistock Clinic where he secured an environment for colleagues like Wilfred Bion John Bowlby and Eric Trist to create and distribute their valuable ideas Now for the first time here is a collection of the works of John D Sutherland The papers are stunning in their clarity and in the scope of their vision The book's three sections reflect Sutherland's major interests object relations theory its application to groups and institutions and the development of the self As he was fond of saying object relations was not so much a theory as a way of working and he puts this idea into practice from understanding

his individual patients to developing a blueprint for community mental health His papers on psychoanalytic theory reveal an erudite grasp of theory building Those on application show his profound concern for the human condition Deriving partly from his self analysis after the age of 70 his later papers take him beyond object relations theory to a theory of the self No psychoanalytic thinker has such a capacity for tolerating complexity No one else has shown a similar ability to relate personal individual depth psychology to social psychology Collected together in this volume John D Sutherland s papers present a remarkable appreciation for the needs of the individual and the community This book is both classic and contemporary It will appeal to individual and group psychotherapists of any discipline psychoanalysts pastoral counselors social workers and community development workers A masterpiece of care concern clinical acumen and vision this book is a major contribution to human understanding *Containing Rage, Terror and Despair* Jeffrey Seinfeld, 1996 Clinicians are often perplexed and discouraged at seeing their patients suffer even more intensely as they face the defenses conflicts and deficits that have impeded their growth and development Often at the center of this increased suffering is an intense fear of giving up internalized bad objects Countertransference Analysis Karl König, 1995 Beyond the idea of a blank screen and firmly rooted in today s understanding of the mutual give and take of conscious and unconscious processes in therapy hours Karl König s Countertransference Analysis examines the therapist s reactions to the patient and how best to use them effectively in treatment
